

The main purpose behind this expansion is to enable AWL to enter into high growth & niche areas of welding application which includes nuclear power, super critical boilers & some special steel applications. This would not only help in widening its product profile but would enable the company to improvise on its margins backed by low competition in these niche segments.

## **Volume growth pegged at 25% for the current fiscal**

The current capacity utilization in the welding consumables segment stands at 46%. With the pick up in the capex cycle across all its user industries viz Steel industry, petro chemicals, fertilizer plants, hydro electric and thermal power plants, nuclear power plants, ship building and heavy machinery, steel, ship-building, defense, power, automobile, general fabrication and engineering industries, we believe that AWL is all set to witness a decent volume growth over the next two years.

It may be noted that in FY10, AWL clocked a volume growth of ~42% from 18,655 TPA in FY09 to ~24,000 TPA in FY10. Considering a further uptick in the demand for electrodes, we expect a volume growth of 25% (on conservative basis) over the next two years.

## **Valuation & Recommendation**

Ador Welding Limited, one of the leading players in the welding consumables & equipment space is all set to benefit from pick up in the investment cycle in the core infrastructure space resulting in strong demand outlay for its welding products. With the volume growth of 25% forecasted for next two years, AWL is expected to exhibit a revenue & PAT CAGR of 24% & 26% from FY10 to FY12 respectively. **We maintain a BUY on the stock at CMP with a price target of Rs 298, an upside of 44% for 15-18 months horizon.**
