MANAGEMENT DISCUSSION & ANALYSIS

A) INDUSTRY STRUCTURE AND DEVELOPMENT

Indian economy has performed well during the year 2004-05. The estimated GDP growth of about 6.9% over the unprecedented growth of 8% in the GDP previous year makes India one of the fastest growing economies in the world. It is heartening that the pace of industrial growth is impressive in the current year. Your Company prospers with industrial growth. The impact is visible in greater demand for the hiring of its mobile cranes. There has been growth both in the topline and the bottomline of the company, without considering extra ordinary items. The provision of escalation in lease rentals in the long – term contracts of the company with the ports resulted in growth in income from the port operations. Emergence of opportunities for deployment of certain specific kinds of mobile cranes also led to increase in earning from mobile cranes business.

The management has been making efforts to contract new business both in the port sector and the mobile crane business. The Company has been qualified for submission of bid for maintenance and operation of two Container Terminals at Kandla Port on BOOT basis for 30 years. The Company is looking at business opportunities as well as strategic alliances with foreign operators of ports to embark on the business of port management in India and abroad.

Cardinal Logistics Private Ltd., a subsidiary of the company, having an agreement with Kolkata Port Trust (KPT) for supply, operation and maintenance of 2 Nos. Mobile Harbour Cranes with necessary back up support equipment for handling containers on 'Own, Operate and Maintain' basis at Container Terminals in Kolkata Dock System of Kolkata Port Trust (KPT) for a period of 10 years has since successfully commissioned the port project.

Mobile Crane business has been on uptrend. Your Company has already entered into contracts with major PSUs and private sector companies for hiring of mobile cranes. Looking to increasing demand, your Company has made fresh investments for acquisition of specialized cranes to suit present demand. Demand scenario also provided opportunity for deployment of old idling cranes of the Company.

One contract with Jawaharlal Nehru Port Trust has been almost complete and the Cranes will be handed over to them as and when the contract period is over. The Company is looking at mobile crane business and its investments in port business through subsidiaries to augment loss in revenue on completion of long term port contracts of past.

B) OPPORTUNITIES AND THREATS

The Indian economy is clearly looking up and for ABG too, the year 2004-05 has been a fairly good year. During the year under review, the performance of Container and Bulk handling cranes deployed at Jawaharlal Nehru Port, Chennai Port, Cochin Port and Mormugao Port continued to be satisfactory. The operational income from these cranes has recorded growth on the basis of the escalation clause in the contracts with the Port Trusts. The mobile crane hiring business too has shown significant improvement. Your company has made further investments in brand new cranes against contracts for crane hiring.

Cardinal Logistics Pvt. Ltd. has successfully commissioned the

Mobile Harbour Cranes and the back up support equipment. It is expected that it will start contributing to the bottomline of the Company.

As India increasingly integrates into the global market and becomes a party to free-trade agreements, as interest rates and the stock markets align themselves to move in tandem with global economies, your Company will continue to explore and pursue to tap the opportunities available in the globally competitive markets.

C) RISKS AND CONCERNS

Market & Industry Risk

The Company has endeavoured to develop a flexible long-term strategic plan that will enable it to capitalize on the opportunities presented by the sector, while at the same time mitigating the inherent risks. The Company is exposed to the risks of the changes in government policies on infrastructure development, privatization of ports operations and the opening up of port sector for foreign investment. The estimated GDP growth of about 6-7 percent makes India one of the fastest growing economies in the world. The Company has used the present situation to its advantage and is looking for expansion in India and abroad to reduce the risk in business.

Interest Rate and Foreign Exchange Risk

The Company has always contracted fixed price loans to avoid any interest rate risk. But in the falling interest rate regime, the Company's continuous endeavour to reduce its overall borrowings / liabilities as well as the restructuring / refinance of high cost debts have resulted in substantial savings in finance cost. The Company follows a conservative policy of taking forward covers or other risk mitigation products to avoid any forex risk.

D) INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Company has in place adequate systems of internal control commensurate with its size and the nature of its operations. These have been designed to provide reasonable assurance with regard to recording and providing reliable financial and operational information, complying with applicable statutes, safeguarding assets from unauthorized use or losses, executing transactions proper authorization and ensuring compliance of corporate policies.

The Company has an Audit Committee, details of which have been provided in the Corporate Governance Report. The Audit Committee meets the Company's Statutory Auditors to ascertain, inter alia, their views on the adequacy of internal control systems in the Company and keeps the Board of Directors informed of its major observations from time to time.

E) HUMAN RESOURCE MANAGEMENT

Employee relations remained cordial throughout the year. The Company has a system for Annual Performance appraisal for its employees. The grant of increment or accelerated increments is related to work performance.

F) CAUTIONARY STATEMENT

Statements in the Management Discussion and Analysis describing the Company's objectives, projections, estimates, expectations may be "forward-looking statements" within the meaning of applicable securities laws and regulations. Actual results could differ materially from those expressed or implied.
