PERFORMANCE OF YOUR COMPANY

Your Company continued to improve its performance on all parameters during the period. Your Company has effectively leveraged its assets, infrastructure and investments, resulting in improved productivity and performance for the period under review.

Your Company continues to strengthen its pre-eminent position in domestic and international markets and has significantly grown its operating profits, with a mixture of topline growth, effective cost management and the right product mix, resulting in profit after tax of Rs. 118.34 Crores as compared to Rs. 108.29 Crores of the previous year.

Your Company recorded gross sales of Rs. 9337.88 Crores as against Rs. 13515.84 Crores for the year 2004-05. The profit before tax showed a growth of 20% at Rs. 156.45 Crores as against last year's achievement of Rs. 130.62 Crores.

TO CHANGE NAME OF THE COMPANY

Your Company's name is a visible symbol to all the stakeholders who interact with us. Your Company has evolved into a diversified entity taking up new challenges and initiatives. Hence, the Board of Directors of your Company in their meeting held on 20th May, 2006 deliberated on the Company's present name viz. Adani Exports Ltd. and found the same not reflecting the entire spectrum of its activities.

Your Company was incorporated on 2nd March, 1993 with a primary focus on commodities and with thrust on exports. Over the years, it expanded its horizons and has become a large diversified organization. Company's overall business model comprises of the following SBUs:

- "Energy" Group
- "Agro" Group
- "Metals" Group
- "Real Estate" Group

These SBU's are structured as division / subsidiaries to ensure value and operational optimization. The emphasis is also to aggregate businesses under a single value chain to reap benefits of integrated domain expertise and comprehensive solutions to customers. The new name Adani Enterprises Ltd. will clearly convey the message of business diversity, scale of operations and ruggedness of the business model to all its stakeholders.

DIVIDEND

Considering the overall performance of the Company, the Directors have recommended dividend at 45% (Re. 0.45 per share of Re. 1 fully paid-up) for the year ended 31st March, 2006. This entails a dividend payment of Rs. 10.21 Crores. The dividend distribution tax borne by the Company will amount to Rs. 1.43 Crores. The dividend will not suffer tax in the hands of the shareholders. The final dividend, if approved, will be paid to the members whose names appear on the Register of Members as on 26th July, 2006. 6,50,323 equity shares allotted during the year upon conversion of 95 Foreign Currency Convertible Bonds (FCCBs) will be entitled to full dividend.

SEGMENT REPORTING

Your Company is a **"Five Star Export House"** with operations covering a wide range of commodity groups such as, Agro, Energy, Precious Goods and Textiles. In view of the integrated nature of business in its entirety, there are no separate segments within the Company as defined by Accounting Standard 17 (Segmental Reporting) issued by the ICAI.

FIXED DEPOSITS

During the year under review, your Company has not accepted any fixed deposits under Section 58A of the Companies Act, 1956 read with Companies (Acceptance of Deposits) Rules, 1975.

LISTING and ISIN No

The equity shares of your Company are listed at The Stock Exchange, Mumbai, National Stock Exchange and Ahmedabad Stock Exchange. The listing fee for the year 2005-06 has been paid before the due date. The Company's shares are compulsorily traded in dematerialized form. The ISIN number allotted is : **INE 423A01024**. The details of shareholding pattern, distribution of shareholding and share prices are mentioned separately in the Corporate Governance Report.

SHARE CAPITAL

- **Conversion of Foreign Currency Convertible Bonds into Equity Shares of the Company and increase in Paid up Share Capital**

During the period under review, your Company had received four conversion notices for conversion of 195 Foreign Currency Convertible Bonds (FCCBs) of USD 10,000 each into 13,34,875 equity shares of the Company.

ANNEXTURE - IV

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The management of Adani Exports Limited presents the analysis of performance of the Company for the year 2005-2006 and the outlook for the future, which is based on assessment of the current business environment. It may vary due to future economic and other developments, both in India and abroad.

Economy and Business Environment

Review of Economy

During the year 2005-2006, the Indian economy appeared to be on the right track for GDP growth and planned reforms and was supported by healthy foreign exchange reserves, efficient utilization of capabilities by the manufacturing sector, a bullish stock market, robust increase in exports and low inflation. Despite some political difficulties, there was continuity in reforms and reiteration of the intent to improve the quality of life of the weaker sections of the society. Implementation of Value Added Tax by all states in 2006, was a historic and positive move.

Continuous positive development on the economic front and policy initiatives by the Government present an exciting environment for a Company like yours. Sustained inflow of global capital into the Indian economy, falling import duties, rapid changes in retail environment and an increasing demand for FMCG products, are positive indicators for your Company. However, as a result of economic development and globalization, the competitive landscape in which the Company operates has changed substantially over the years and this brings with it, emerging challenges. It also requires greater understanding of the consumer needs and trends as well as ability to address them in a sustained and competitive manner.

Fiscal scenario improved but remained a cause for concern. Bottlenecks in infrastructure more particularly power generation, coal production and transportation became evident. While from an economic perspective the year 2006 begins on a comfortable note, long-term solutions to the weak spots in the economy need to be addressed to achieve a sustained GDP growth rate of over 8% p.a.

The management's views on the Company's performance and outlook are discussed below:

A. Agro Commodities

We take great pleasure in informing that the Company has expanded its Agro Operations and has become one of the leading Companies in Agro Trading. To flank the exports business, the Company has started venturing into domestic trading opportunities in Agro Commodities. Further the Company has emerged as a leading importer of pulses into India.

Opportunities available for hedging and sourcing on the commodity exchanges were also beneficial. This has provided a transparent and safe platform for trading in agricultural commodities which was earlier confined to the unorganized sector.

During the year under review, the Company has commenced Stock and Sale operations in Castor Oil in Europe. This has resulted in giving an edge to the Company in exports of Castor Oil. As a matter of fact Adani Exports Ltd., is now a leading exporter of Castor Oil from India.

The Company's Soya operations have continued to grow. The Company has become the leading exporter to highly competitive and demanding market of Japan. Apart from this, the Company continued to cater to its traditional markets like Indonesia, China, South Korea etc.

B. Textiles

The termination of quota regime in world trade and the phasing out of the multi-fibre agreement with effect from 1st January, 2005, has thrown open challenging opportunity of growth for the Textile Industry. The market dynamics are undergoing a fundamental change with manufacturing growing faster in developing countries which has resulted into emerging of new markets in Asia, Latin America and Africa where realisations have come under pressure in products like cotton yarns but with focus on increasing volumes will take care of sustained growth. The Company has also established strong buyer base for its yarns. The Company's position in the highly conscious markets like Europe has been improving.

C. Energy & Minerals

The performance of the Energy Sector has shown much improved results in the fiscal year 2005-06 over the working of the Previous Year. Coal production rose by 12% per cent in the fiscal 2005-06. Performance of the Company in the energy sector is as under :

Coal and Coke : Despite volatility in terms of prices, not only all the commitments of domestic orders were fulfilled but new orders were picked up from Electricity Boards and were successfully executed.

Iron Ore : Procurement of Ore from the mine owners had been difficult during the financial year 2005-06, due to steep increase in ore prices leading to much speculation and withholding of supplies by them, despite which the Company has exported over 1.5 million tones of ore and has posted healthy margins. In view of the fluctuation in iron ore prices resulting in constraints in procurement of sufficient iron ore, the Company has made arrangement for dedicated minings.

The performance of Iron Ore handling at the Belekeri Port was considerably improved and all supplies to foreign buyers were Efficiently executed.

Power Trading: The Operations have resulted in a significant marked improvement and about 3000 million units have been traded with improved margins.

D. Petroleum, Oils and Lubricants (POL)

In the POL business, the Company's better services in the form of liquid storage facilities and single window clearance right from purchasing of cargo till the loading on buyer's tankers, backed by port facility, along with sourcing expertise & competitive pricing has resulted into better business growth for the Company.

During the year under review, the Company has also ventured into the business of Bunkering. Bunkering business entails supplying fuel to the ships after blending and heating.

The Company is currently doing Bunkering at Mundra Port. Every vessel which calls at Mundra Port, can use the bunkering facilities. Earlier all these vessels were using bunkering facilities of either, Fujairah or Singapore for sourcing fuel and carrying transit fuel. This restricts them to convert their transit fuel into the commercial cargo, which would, otherwise, supplement their freight income.

The Company proposes to develop bunkering facilities at Mundra & would target these customers. The Company is procuring two double bottomed double hulled bunkering barges and developing the related facilities.

E. Petrochemicals

The Company continued to be a leading trader of Petrochemicals in the country with volumes topping 2,50,000 MT. The year was marred by large fluctuations in prices of basic Petrochemicals due to the volatile prices of Energy/Crude oil. With support from major Petrochemical manufacturers such as BASF Malaysia, DOW Chemicals - U.S.A, Mitsui & Co. - Singapore, Sumitomo Corporation - Singapore, Degussa Chemicals - Germany, amongst others, the Company continued to grow its market share even in adverse market conditions.

The Indian industry, in particular, Laminates, Inks & Coating, Performance Chemicals sector continued to grow at a rapid pace & helped the Company to enter into long term quantity tie-ups for products such as Methanol, Phenol, Styrene and monomer. The Company continues to serve a spectrum of industries such as Agro, Chemicals, Pharmaceuticals, Dyestuffs, Inks & Coatings, Emulsions, Resins, Plasticizers, Performance chemicals etc. & maintain a leadership position with an active customer base of over 2000.

With dedicated port facilities the Company was uniquely placed to capitalize on the growing import needs of Ethanol, a basic raw material, during the year under review.

G. Fertilizers and Raw Materials

During the year under review the products i.e. Sulphur, Ammonium Nitrate, etc, witnessed an increase in trading volume by almost 10% cumulative over the previous year. The tough domestic market scenario of over supplies & erratic / unpredictable International market scenario resulted in tough going, thereby affecting the bottom line.

The Company hopes to expand the business by regularly importing Sulphur Vessels at Haldia & Vizag Ports and consolidate its already existing strong presence at Kandla & Dharamtar.

We are planning to add a few new products to the existing basket of products to add value & flank the products already stabilized in the mature market segments.

F. Precious Metals

During the period under review, there has been increased demand for Gold globally as a store of value as also for fashion jewellery and even for industrial use with Indian continent continuing to be a major market for domestic and for export jewellery consumption. The increased demand with the stagnant production facilities has brought in its wake, a spurt in the price of Gold to unimaginable levels even confirmed by the stake holders.

These are not without its consequences to the trade and the trade margins have started sinking. The Company has made a conscious decision to concentrate on bottom line compared to the earlier appetite for top line growth. The Company has, during the year, confined its operations only where margins are substantially higher.

In line with the present day trend, the Company has also established a unit in the Surat Special Economic Zone for its operations and has plans to have a similar unit at NOIDA to cater to the global demand for specialized ethnic jewellery.

Competition/Outlook on opportunities

Since inception, the Company is predominantly involved in the global trading of various commodities like Agro, Textile, Energy & Minerals, Power Trading, Petroleum, Oil and Lubricants, Precious Metals. Over the years, the Company has developed significant expertise and positioned itself into a dominant position in the global trading industry of the Country. The Company's long-term vision and ability to foresee good and profitable business opportunities and take calculated risks have immensely helped the Company to secure competitive edge over others. However, competition is global phenomena and is inherent in every industry. Global trading industry is also not an exception to it. In order to survive in the global competitive scenario, the Company has to take necessary preventive steps to mitigate the adverse effects of certain factors beyond the control of the Company like exchange rate fluctuation, change in government policy for foreign trade, WTO implications and competition from volatile commodity markets. The Company has already implemented commodity wise strategy to maintain its competitive edge and continuously strives to improve it. In view of its core competencies and expertise, the Company is poised to maintain its competitive edge in the global trading industry during the years to come.
