10. BUSINESS PROSPECTS:

Although Cement industry continued to remain sluggish in all key markets during the last financial year, there is an expectation that to stimulate growth in sluggish economies - and in India - respective governments will have to resort to infrastructure spending which will trigger improvement in capacity utilization at Cement plants. The Company will be a beneficiary as and when the same is witnessed. In addition, there are certain specific markets in Asia, Africa and South America, which continue to add capacity or have increased capacity utilization. In China, the Company currently maintains a limited presence by marketing specific products but China continues to remain an important market where we will continue to invest resources and strategize for a bigger market share. In India, while new capacities were created in this segment, the pace has distinctively slowed down. Nevertheless, with the initiatives now being taken to provide stimulus to the Infrastructure Industry, India's cement production is expected to increase in the next financial year and your Company is confident of maintaining a similar growth in the cement replacement market in India.

From a strategic positioning perspective, a significant contribution in your Company's growth is expected to come from the mining industry. The growth prospects are primarily emanating out of the large annual replacement market in this industry. Here, we are currently catering to the requirements of four major metal ore types, viz., Iron, Platinum, Gold and Copper, with total emphasis on the replacement market. Further, your Company is positioned as perhaps the only Company in the world offering complete range of High- Chrome consumables to the mining industry, which include grinding media as well as mining liners. This positioning is unique

BOARD'S REPORT

to your Company and augurs well for the consistent and steady growth in this industry over medium to long term. As the Company is focused on four major ores, the declining fortunes of one commodity do not significantly impact your Company's growth prospects. During last few years, we have steadily increased our presence in the major mining groups across the globe with a stronger focus on major mining centers like Australia, Africa, North America and the Far East Asia, etc. While the current focus of the Company in mining segment is outside India, your Company also has a major share of the domestic mining demand and shall be able to capture incremental demand as and when the same arises.

In as much as the Thermal Power Plants are concerned the Company continues to enjoy a niche position in this particular segment in India. The Company will strive to maintain a steady growth rate in this particular segment matching with the rate at which the sector grows.
