ANNEXURE - 2 TO THE DIRECTORS' REPORT

MANAGEMENT DISCUSSION AND ANALYSES

Forging Industry:

The Company has only one segment and that is 'forgings'.

Forging is a manufacturing process where metal is pressed, pounded or squeezed under great pressure into high strength parts largely catering to automobile industry as such; the performance of the Forging Industry is very much dependent on the performance of the automobile industry which is, in turn, dependent on demand for vehicles.

Location

The Company's Chinchwad plant is having a comprehensive Forge Shop with Presses and Hammers together with all balancing equipment. This plant is located in the Forging Capital (Pune) of India with all logistical and infrastructure facilities in place, and serves a complete range of small segment forgings to almost all the major OEMs, directly or indirectly. It enjoys a "Preferred Vendor" status with its Customers. Quality Accreditations like ISO/ts 16949:2002 and ISO 9001: 2000 are in place.

Operation

The general economy started slowing down since 2007 and faced further down trend in the mid 2008 followed by recession in the auto industry. Due to this recession, we suspended the operation in December, 2008 particularly since there were no orders forthcoming, as also OEMs were not lifting material already ordered. Further, with the losses mounting each month, it became difficult to meet the regular salary / wages and other statutory liabilities in the absence of any sale revenue as also non receipt of our receivables from customers for supplies already made, this led to restlessness and indiscipline amongst the workers which ultimately forced the management to declare a lock out at Chinchwad plant.

Market Outlook - Industry Scenario:

The general economy started slowing down since 2007. The financial crisis deepened further in 2008 with several leading financial houses and businesses having to write off heavy losses in their books leading to the general economy, and particularly the auto industry, taking a turn for the worse.

OEM customers built up stocks in expectations of continued growth throughout the year 2008. However, these expectations were belied and the bottom dropped drastically in the second half of 2008. Within a very short time, with severe recession in the auto sector coupled with severe liquidity crunch, forging demand came to a standstill and orders evaporated. To make it worse the OEMs also refused to lift material for which they had already released formal orders and firm delivery schedules. With most of the auto OEMs resorting to closures and lay-offs together with extremely delayed payment for material already supplied, small and medium unit were faced with no alternative but to suspend operations. It was impossible to meet regular monthly expenses of labour, steel, power and other statutory dues in the absence of any supplies/ sales to regular customers. Initially, the industry geared for a short slow down in the automotive industry, however, it was impossible to anticipate the scale, size and impact of the slowdown which continued into early 2009. The sheer systemic demand drop across all sectors from financial to automotive and to the economy as a whole was unprecedented. Manufacturing sector witnessed a sharp demand drop while the performance of Indian Automotive sector showed a predominantly negative trend. Sales of medium and heavy commercial vehicles, to which Amforge predominantly supplies, declined sharply for the second consecutive year and the major commercial vehicle producers experienced drop in production of over 60%.

Internal Control System and their Adequacy

Independent firm of Chartered Accountants has been appointed to carry out internal audit functions to ensure adherence to various policies and procedures already introduced and followed in the Company. This is also ensuring compliances with various statutory requirements. The internal control systems have been reviewed by the Audit Committee.

Discussion on financial performance:

During the year under review, the Company's gross revenue remained at Rs. 2,975.44 Lacs. The operation at Chinchwad plant was suspended in December, 2008 due to recession in the automobile industry and subsequent to declaration of lock out in May, 2009.
