PERFORMANCE

Year 2012-13 encompassed mixed fortunes for the Indian economy. In the initial months it showed good prospects of growth hence the company can do better comparing to the last year.

Persistently rising inflation started taking draconian shape that prompted RBI to take stern steps to check its impact on the economic growth of India. Interest rates started climbing upwards at almost every RBI policy meet. This in turn dampened the financial market sentiments. At the global scenario, US got into clutches of double-dip depression fears and Euro zone never could get out of the sovereign debt crisis as such. The uncertainty again started gripping the global financial market.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT A. INDUSTRY STRUCTURE & DEVELOPMENT

Last financial year the global economies had shown upward revision more because of the continued stimulus measures administered during 2012-13 by the developed and emerging economies. India too was not an exception. Liquidity infusion resulted in the economic recovery across the globe but soon it was realized that it was not enough for the continued upsurge. However in the year 2012-13 amidst the rising inflation, increase in rate of interests, higher commodity prices and volatility in the global commodity markets dampened the overall outlook of several economies. Despite all these the Indian economy is still expected to grow at around 8%.
