III) Other information.

1) Reasons for the loss or inadequacy of profits and the steps to be taken for improvement

It was necessitated for the company to do some of its offshore projects at onsite. Due to the difficulties in getting visas in India, during the year the company has hired resources in USA to ensure timely delivery of the projects. This has resulted in increase in the direct cost and has obviously brought down the profitability of the company.

The company has started monetizing the investments made in products and solutions. The main reason for getting into the products and solutions space is to maximize the profit and this segment always yields more profit than the rudimentary software services. We expect to have more revenue from the products segment in the current and coming years. This will increase the profitability of the company in the coming years and moreover the usage of high cost resources used for onsite projects was only a temporary one and the company cannot afford to have the offshore services at onsite cost.

2) Expected increase in productivity and profits in measurable terms

The company's organic growth has always been around 10%-15%, due to the global economic slowdown, there is not much increase in the

revenue. We expect this to back to the earlier level i.e. 10%-15% growth over the previous year. With regard to the profitability, as explained the profitability registered in 2012-13 is exceptional and unprecedented. We expect to backtrack the profitability to the previous level of around 8% to 10%.

From the CMD's Desk

Dear Shareholders,

It gives me great pleasure to discuss the performance of your Company. At the outset let me thank all of you for your continued support in the journey of your Company in its second decade.

During the year 2012, the global economy continued to be disturbed with deterioration of financial conditions and instability. Financial tightness and stagnation prevailed both in Euro-area and in the USA, which dampened the prospects of global recovery. As a result the global GDP growth was pulled down to 3.20% in 2012 from 4.00% in the year 2011. Even emerging markets and developing economies have registered slower growth.

In this global environment, India could hardly insulate itself from the slowdown. Inflationary pressure and the slowdown prevailed and the investment climate was subdued, leading to sharp decline in growth rate.

Your Company during the year was able to record an Income of ₹152.07 crores on standalone basis and ₹221.45 crores on consolidation basis. There has been a decline in the performance during the year 2012-13. Keeping in mind the long term interest of the Company and to maximize return on the investment of all the stakeholders the Company took a decision to transform itself into an intellectual property development enterprise. But at the same time, it had to continue with its core existing portfolio. Thus infusion of funds both for investments and for enhanced working capital requirement has become necessary. But the macro economic conditions that prevailed world over, could not support this. The receivables of the Company increased and the pressure on working capital mounted. The Company under these circumstances had to strike a fine balance between venturing into new business and of retaining the existing portfolio. The Company took a conscious decision to exit some of the relationships where the receivables were mounting and also where the margins were lower. Though from the revenue perspective this decision may look to have a negative impact but from the financial health perspective this had a very positive impact which is evident from the financials submitted for the subsequent quarters with the exchanges. This we feel is the right way to move forward. We will continue to put our focus and efforts towards this model and are confident that this will pay off in a big way when the market becomes more

conductive for growth.

We believe our ability to grow on a sustained basis and maintain the differentiation in the market place is to a large extent dependent on our strength to attract, train, motivate and retain our people. We intend to further develop our position as a preferred employer in our industry and place special emphasis on Human Capital Management.

I am happy to inform that the fundamentals of your Company is strong, which has been demonstrated under many challenging situations. Now the journey is by no means complete and we have many miles to go and I am confident that your Company will derive the benefits of what has been done so far and the efforts put in by all of us will make the Company strong and prosperous and will be a benchmark for the industry.

I would like to place on-record my heartfelt gratitude to our customers, shareholders, Financial institutions and more importantly our employees who have supported us at every stage of our journey and I do hope that their support and goodwill will continue as we grow together; from strength to strength.

Best regards,

Ravi Kumar D
Chairman and Managing Director
