DIVIDEND:

Due to inadequacy of profit, no dividend for the year was recommended.

OPERATIONS:

During the year under Report, your Company earned revenue of Rs.9078 lacs and recorded a net profit of Rs.393 lacs. Revenue growth recorded during the year was 5.29% and profit after tax improved by 188%.

CAUSTIC SODA PLANT :

During the year your Company achieved a highest ever production of **44256 MT** of Caustic soda as against 44,005 MT of Caustic soda during the previous year. This was made possible because of optimization of capacity and implementation of stringent controls over costs and quality and uninterrupted power supply through our own Captive Power Plant.

The global slowdown which was prevalent throughout the last calendar year had its adverse impact on the Indian economy and almost all Industries were impacted thereby.

Chlor-Alkali Industry was not an exception and was also adversely affected due to recessionary trends prevailing in the Industry. Lower off-take from the consuming industries and continued pressure on the price front would have affected the working of your Company severely but by adopting prudent marketing policies and savings in power cost due to captive power generation, your Company was able to sail through this crisis and keep its head above the water level.

Your Directors wish to place on record their appreciation for the support and co-operation extended by Hindalco Industries Limited during the adverse market conditions prevailing throughout the year.

CAPTIVE POWER PLANT :

With the successful commissioning of Power Plant in September 2000 and Commercial generation having started from 1st January 2001, the Power Plant has been functioning smoothly and that too without any interruption during the year except for annual shutdown.

Being the first full year of operations, the Plant has shown excellent operational efficiency. The annual shut down for repair & maintenance was completed in 17 days, which normally takes 25 to 30 days.

An Agreement has also been entered into with JSEB for synchronous operation of CPP with JSEB system and sale of surplus power. Our own Railway siding has also been commissioned during the year which is giving us substantial savings in logistics and handling cost of salt, coal and caustic soda. Your Company has also entered into an Agreement with Central Coalfields Limited for supply of coal for a period of 10 years.

MODERNISATION /EXPANSION :

Considering the current growth and expansion plans of our major customers, your Company is weighing the possibility of increasing the caustic production through modernization and technological up gradation. Due consideration will be given to international caustic soda prices and expected future trends in prices.

FUTURE OUTLOOK :

With Globalization and rationalization of import duties, domestic caustic soda prices are showing steep downward trend. We expect that better chlorine realizations will do the balancing act in maintaining the current ECU realizations. Due to installation of our own Captive Power plant, we have been able to achieve a major cost reduction and in a highly competitive market, we expect to reap the fruits of the same. The world economy is gradually coming out of recessionary trends and its effect being felt in our industries, we expect a positive outlook for your Company in the future ahead.

ENERGY CONSERVATION :

Your Company has been paying adequate attention to conservation of energy. Details regarding the present consumption including Captive generation are furnished in Annexure "A" as per requirement of the Companies (Disclosure of particulars in the report of Board of Directors) Rules, 1988.

RESEARCH & DEVELOPMENT :
