Aditya Birla Nuvo Limited

Integrity, Commitment, Passion, Seamlessness and Speed.

Dear Shareholder,

The Global Scenario

Worldwide 2014 portends to be much more encouraging than 2013, with the forces driving the global economic recovery firmly entrenched. The IMF projects that global economic growth will rise from 3% in 2013 to 3.6% in 2014, and to 3.9% in 2015. This is largely due to a turn for the better in the developed economies - estimated to grow 2.25% in 2014, a full percentage point more than in 2013. US GDP growth for 2014 is projected at 2.8%, and in the Euro area at 1.2%, while China's economy is expected to grow at 7.5%. GDP growth in the emerging markets and developing economies is slated to increase from 4.7% in 2013 to 4.9% in 2014, as these regions step up exports to the developed markets. Continued fiscal easing, loose monetary policy in developed economies and stable commodity prices should boost the global recovery. The nervousness in the financial markets, particularly related to stability of the southern European economies, has abated considerably. Furthermore, we must be prepared for unforeseen geopolitical developments which may have disruptive ripple effects on the global economy.

For the Financial Year 2013-14, your Company's consolidated revenues stood at USD 4.3 billion (₹ 25,893 Crore). EBITDA at USD 823 million (₹ 4,937 Crore) surged by 19%. After neutralizing the one-off items, net profit is up by 16% at USD 204 million (₹ 1,226 Crore).

The Indian Economy – moving on to a stable footing

The outlook for the Indian economy has turned distinctly positive. The increasing traction of the global economic revival and plans to restore vim to India's economy through a slew of timely measures by the new Government by addressing fiscal imbalances and fast-forwarding investment activity should play out positively in the coming year. The RBI's deft moves to stabilize the Rupee, enabled it to recover from a low of around ₹ 68/\$ to under ₹ 60/\$. The current account deficit for the year has been contained at around 2.5% of GDP. Some progress has been achieved on clearing the backlog of large projects whose approvals had been held up. GDP growth is predicted at around 5.5% in 2014-15.

However industrial production needs to accelerate with the IIP declining 0.1% year-on-year in the first 11 months of 2013-14, vis-a-vis 0.9% growth in the same period last year. Inflation also remains a concern, with the wholesale and consumer price indices in March 2014 up 5.7% and 8.3% respectively year-on-year. Continuing inflationary pressures have been a constraint in reducing interest rates. In the medium term, the economy stands to benefit, if the Goods and Services Tax is rolled out. Further initiatives and reforms in areas such as land acquisition, allocation of natural resources, and taxation would help greatly to boost investor confidence and accelerate investment activity. Overall, the stage seems set for India to shift to a higher growth trajectory.

These developments on the global and the domestic front have a telling effect on your Company's growth and end-results.

For the Financial Year 2013-14, your Company's consolidated revenues stood at USD 4.3 billion (₹ 25,893 Crore). EBITDA at USD 823 million (₹ 4,937 Crore) surged by 19%. After neutralizing the one-off items, net profit is up by 16% at USD 204 million (₹ 1,226 Crore).
