Journey of Brand Gati

Overview

25 Years of Gati

The year 2015 is a momentous milestone in our history as we celebrate our 25th anniversary.

In 1989 Gati began with boutique services and evolved itself to be the pioneers in express distribution and supply chain management in India. Gati became the trendsetter in the logistics industry in India and was one of the first companies to print its delivery date on the docket and offer money back guarantee. Gati is also the first logistics company to launch payment only after producing proof of delivery (POD) and a myriad of services that are industry benchmarks today.

Throughout its journey, the company has maintained its commitment to deliver the brand promise of being ahead in reach and thereby sustaining growth. Gati in Sanskrit implies, speed with direction and the company has imbibed and ingrained this in its way of operation. Over the years, the company has proven its ability to operate in complex markets with a variety of interlinked services and a wide network. Today Gati is a pioneer in express distribution and supply chain management with deep roots in niche areas of operations such as e-Com logistics, cold chain operations and other value added services.

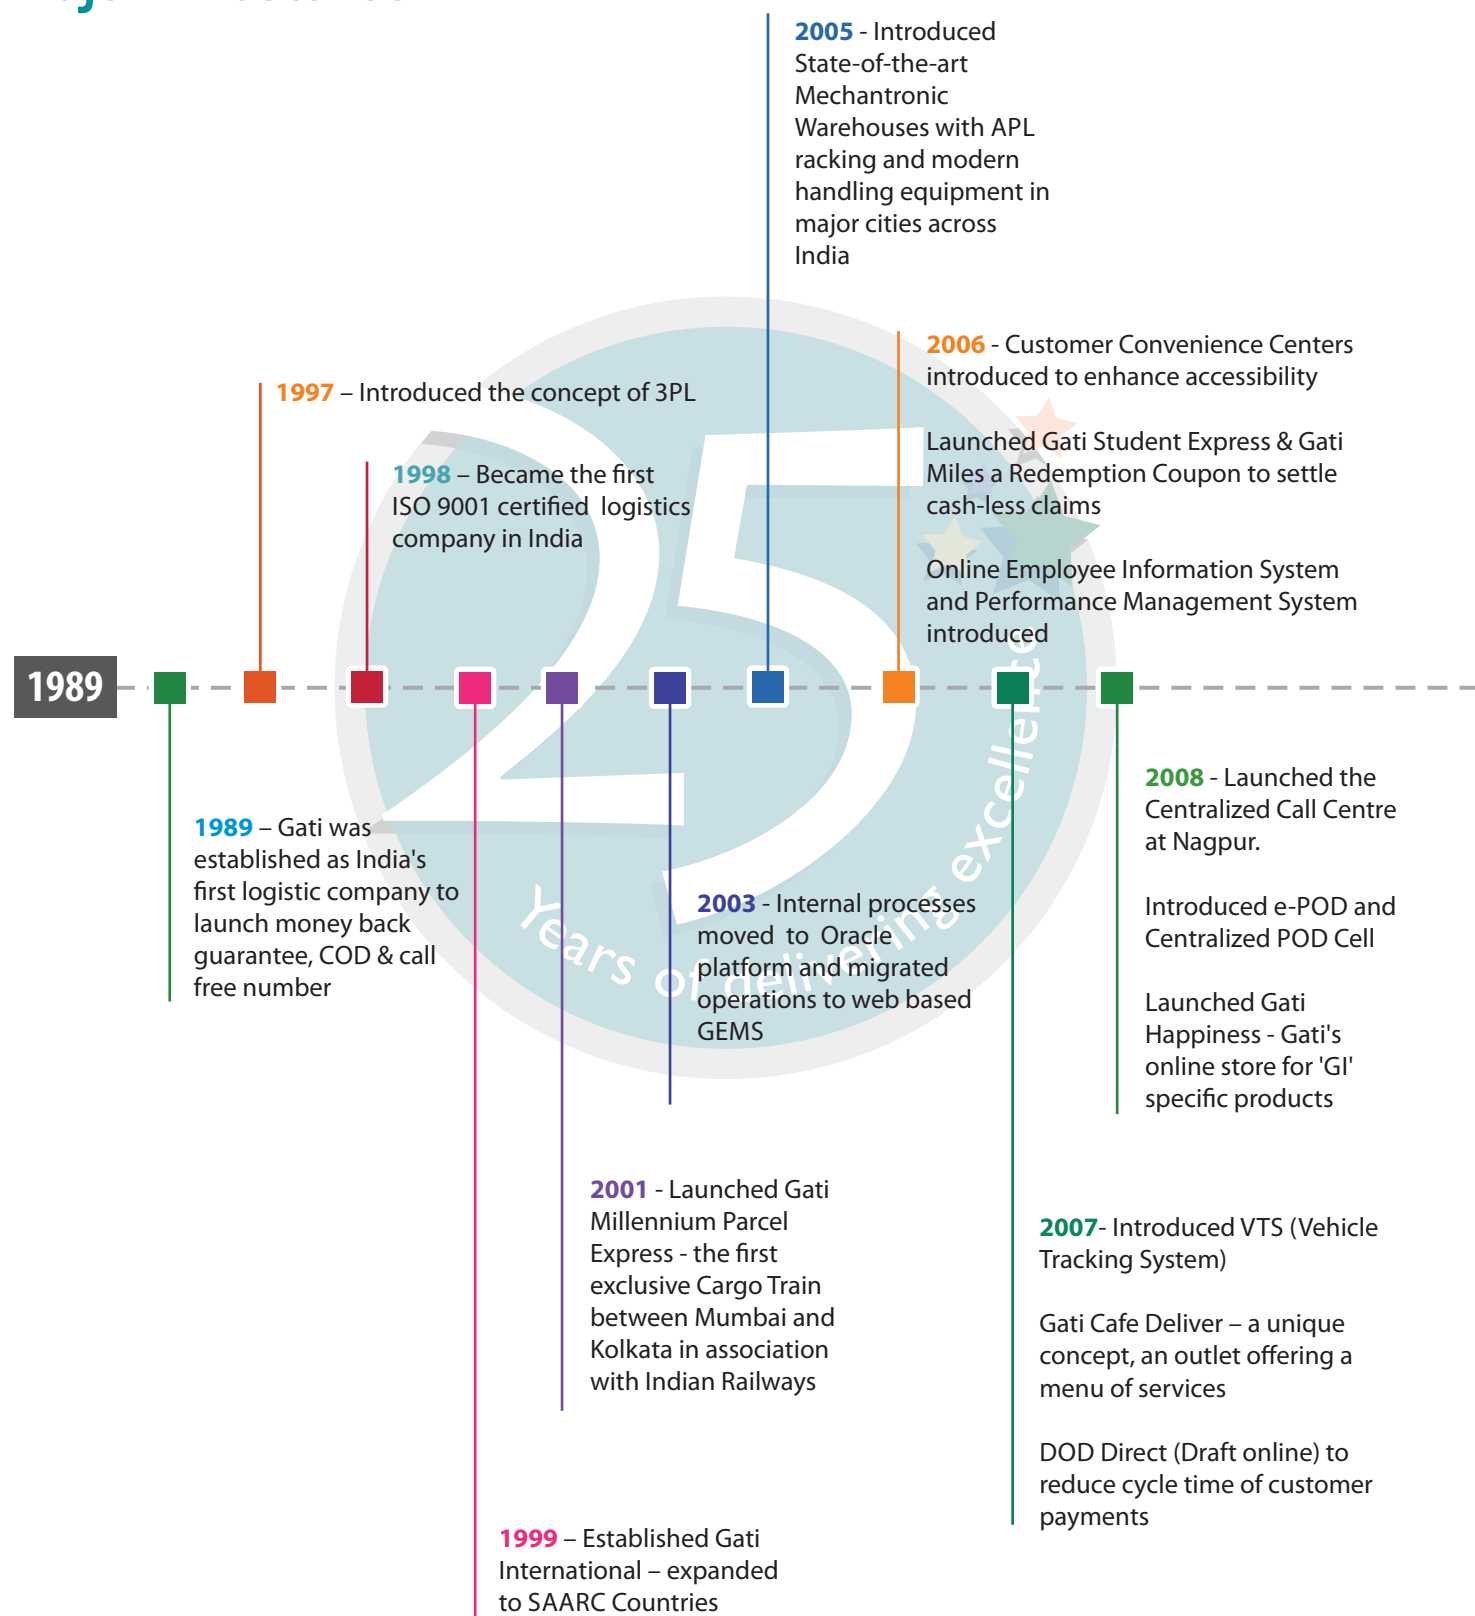

India as a country is taking giant leaps towards being a

global economic leader and Gati is well poised to be one of the change agents to fuel this growth. As the nation stands on the threshold of realising the "Great Indian Dream", the company feels only pride for being a true Indian multi-national that is committed to realising this goal. The future holds tremendous possibilities for the logistics industry and Gati in particular with e-Commerce emerging as a game changer. Gati e-Connect is today delivering a CAGR of more than 100%, adding great value to the business. The company's services for the last mile delivery and a slew of other value added services position it as an end-to-end service provider for e-Commerce companies in India and abroad.

The greatest assets that the company has today are its people. Some of them have been a part of this journey right from the beginning and have shown tremendous commitment and dedication in taking Gati from a humble beginning to being the most coveted brand in the logistics industry.

Overview

Major Milestones

2010 - Gati's first step towards becoming an integrated Supply Chain Solutions provider

ELSC Company of the Year

Overview

Founder & CEO's Message

initiatives that revolutionised the business of logistics. Our achievements have been, time and again, recognised by industry forums, peers and most importantly our customers.

While achieving various milestones during the last 25 years, we learned a great deal about fulfilling management commitments, formulating growth strategies, outmanoeuvring challenges, technology adoption and building stronger relations.

Delivering Performance

Notwithstanding the macro-economic challenges in the recent years, Gati's financial performance was significant with an annual CAGR of 15% in the last 10 years. On the 25th year of our company the Board of Directors has declared a special dividend of 30%. We also successfully floated a commercial paper through our joint venture company Gati-Kintetsu. The company's cold chain division - Gati Kausar's expansion plans are in full swing after the infusion of the private equity by Mandala Capital.

The financial results in 2014-15 confirmed the effectiveness of Gati's business model and reflected on the operational excellence that fuelled the company's growth. I am pleased to inform you that during FY 14-15, on most of the key performance indicators, our achievements are close to the guidance we had given. The Gati group generated a revenue of 1,662 crores, up by 14% from last year through resource optimisation and a keen eye on the emerging opportunities in the industry. Our annualized EBITDA grew by 29% and PAT grew by 59%.

Our express distribution business, the largest business vertical within the group, has increased its delivery

"The hallmark of FY14-15's performance has been the growth of our last mile delivery services to the e-Commerce companies, that posted a growth of 164% over the previous year"

Dear Shareholders

The FY 14-15 marked the silver anniversary for Gati. On Nov 14, 1989 we flagged off the first Gati truck from Hyderabad to Madras. That was the first step towards a dream of revolutionizing the logistics and transport industry which was then considered as a disorganised sector. The journey so far has been marked with tremendous challenges that were thrown at us, every step of the way. But every Gatiite has stood firm and strong and helped Gati shape the express cargo and logistics industry in India, and firming its position as the undisputed pioneer and leader.

Over the years we have set the benchmark for ourselves and the industry by working hard with an unwavering focus on customer service and quality. We pioneered the concept of a third party logistics service provider; launched the first exclusive Cargo Train between Mumbai and Kolkata in association with Indian Railways; introduced mechanized racking systems in automated warehouses and many more of such

capabilities from 60 million in the last year to nearly 70 million packages in FY14-15. The total fleet size, has crossed 5,000. We have also held on to the yield despite a significant drop in diesel price through our strong client relationships, new client acquisitions and by improving operational efficiencies.

Emerging Opportunities

The hallmark of FY14-15's performance has been the growth of our last mile delivery services to the e-Commerce companies, that posted a growth of 164% over the previous year. Leveraging our extensive express logistic network, strong e-fulfilment capabilities and innovative supply chain solution, we are ready to ride on the rapid growth of the e-Commerce industry. To further increase the strategic advantage in this vertical, we have commissioned 2 more eFCs in FY14-15 at Chennai and Jaipur. This is apart from the 3 eFCS in Delhi, Mumbai & Hyderabad.

Our cold chain division - Gati Kausar is a prominent player in the fast emerging Indian cold chain industry. The strength of the company lies in its state-of-the-art temperature controlled, integrated transport and storage facilities. During the year under review we have added 24 reefer vehicles to the existing fleet of 200. We have also commenced work on our first cold warehouse near Gurgaon. Indian Cold Chain industry is expected to grow at a CAGR of ~28% over the next 4 years and projected to reach a market size of 50,000 crores in 2017. Gati Kausar is well positioned to capitalise on this emerging opportunity.

Our Operational & IT Strategies

Our performance over the years is a testimony to the many years of investment in our people and in a

wide range of IT capabilities for achieving operational excellence. Going forward, we will continue to emphasise on growth through talent management and technology adoption, which are the two key differentiators for us. On the operations front, our focus remains on network expansion to stay ahead of the curve and continue to deliver on our promise of uncompromised service quality.

In FY14-15 the company employed IBM's Sterling Commerce Suite, to help online retailers meet the rising consumer demand for efficient delivery of products.

Building Sustainable Communities

Corporate Social Responsibility is an integral part of our business model and we are committed to fulfilling our responsibilities as a member of the society. We as a group continue to contribute towards the field of education, livelihood and environment. Our key initiatives have been providing assistance in constructing schools, helping natural disaster victims in sustaining their occupation and supporting the cause of green environment.

The Future

While the renewed economic initiatives such as "Make In India" are expected to boost the manufacturing activities, the success rate of it will remain vulnerable without a strong logistic support.

With the implementation of GST multiple level of taxation procedure will come down. Network and infrastructure related businesses would get drastically realigned, ensuring proximity to manufacturing locations or consumption centres and ultimately resulting in hub-and-spoke models. From the infrastructure

perspective, the new scenario would reduce the number of warehouses but will increase their sizes, leading to a consolidation of the currently widely spread warehouses across states. This would translate into expansion of some of the existing warehouses and development of new ones. The GST regime will see the emergence of the organized service providers since taxes will no longer be added costs for the businesses. Given the highly fragmented nature of the Indian transportation and logistics industry (the leading 10 listed firms command less than 5% of the overall market), implementation of GST is expected to unleash a plethora of opportunities for companies in the organized sector.

Let me conclude by reiterating the 4 pillars of our corporate value - attitude, behaviour, action and delivery promise. Ever remaining committed to our values has enabled us to be a partner of choice by our shareholders, customers and employees time and again. We are now ever so determined to only grow that trust.

Thank you for your continued support.
