MANAGEMENT DISCUSSION AND ANALYSIS

1. Industry Structure and Development

With the fast depleting fossil fuel and growing industry demand for the same, it is evident that non-conventional fuel is going to generate more demand. The binderless technology using recyclable agriculture waste is a boon to agriculture sector in general and rural economy in particular. Increased awareness for the pollution control and fiscal support by classification of the industry under the infrastructure sector, eligible for specific incentives, shall create atmosphere conducive to the use of alternate source of fuel.

2. Opportunities and Threats

The industry is showing healthy sign of growth. The unit being in the vicinity of the source of raw material supply and having access to the consumers around, there is scope for expansion of user base with the enhanced acceptability and convenience of use.

Raw material, being biomass, is mainly prone to vagaries of monsoon. Unpredictable movement in the seasonal cycle characterised by periodical drought and/or flood conditions has adverse impact on the consistency in production. Open storage of raw material for moisture evaporation is also subject to associated risks.

3. Productwise performance

Your Company operates only in one segment, i.e., making Bio-mass briquettes out of agriculture waste.

4. Outlook

Considering buoyancy in the Indian economy and expected growth in GDP, the outlook for the Indian Industry is very bright. Your Company is expected to maintain its growth rate both in terms of improvement in manufacturing techniques by use of economic alternatives and use of efficient raw material mix to match the availability and cost.

5. Risk and Concerns

Raw Material Price risk

Alternative and more productive use of agriculture waste and its demand in other sectors can have adverse impact on the fixed price mechanism prevalent in the area together with bad monsoon characterised by lesser agriculture production and change in product preferences by the farmers. Organisation and education of producing farmers can ensure availability of raw material at consistent price.

Storage Risk

Open sun drying for raw material and storage of finished product needs protection with preventive measures to safeguard its utility and the purpose.

6. Internal Control Systems

The Company's Internal Control systems are regularly reviewed by the Internal Auditors, Statutory Auditors and the Audit Committee. The Internal Audit is done on quarterly basis and the observations of the Auditors are discussed in the Audit Committee meetings and follow up action is taken wherever required.

7. Financial performance with respect to operational performance

With the change in management and for re-design of the production routines to secure enhanced operational convenience, the production, which is at halt since, 01.08.2005, is scheduled to commence on its result oriented alignment. To ensure enduring potential, growth strategy is under consideration. Ploughed back resources are being used to match the need of the recent developments.

8. Human Resources and Industrial Relations

With the infusion of professional and pragmatic vision, labour policy is being planned to ensure retention of skill after new recruitments.
