MANAGEMENT DISCUSSION & ANALYSIS:

Economic Scenario and Outlook:

The economic growth in India accelerated in Fiscal Year 2016, is projected to decline to 7.4% because of slowdown in the public investment and declining exports. The global growth is projected at 3.4 percent in 2016. The Investment will pick up gradually as excess capacity will fade and deleveraging continues for corporations and banks.

The Indian manufacturing sector seems to be emerging from an almost stagnant state in the recent past and heading towards a path of growth. This has been acknowledged by various multilateral organizations, which recently described the Indian economy as one of the few bright spots in the global economy. While investments in some of the core sectors remain a matter of concern, the economy is expected to do better in months to come. Similarly, Start-up India will supplement the government's efforts to encourage manufacturing in India.

Particularly, geopolitical uncertainties and a renewed rise in the U.S. dollar may be a near-term risk. However, the growth rates for India, China and Southeast Asia are unlikely to see significant improvement in 2016 compared to last year.

Industry Outlook and Opportunities:

The Company mainly deals with Investment activities in some of the unlisted closely held companies as well as metal trading. The securities market in this financial year was having virtuous growth. However, the Company do not foresee any substantial changes in its business and profitability in the coming year.
