MANAGEMENT DISCUSSION AND ANALYSIS REPORT

The Indian textiles industry is one of the leading industries in India having evolved impressively from a domestic small scale industry to becoming a major employment and GDP contributor with a massive manufacturing base. It is also one of the largest and most important sectors of the Indian economy in terms of output, foreign exchange earnings thus contributing greatly to the exchequer. The Textile sector occupies a unique position as a self-reliant industry, with substantial value-addition at each stage of processing. It has vast potential for creation of employment opportunities in the agricultural, industrial, organized & decentralized sectors and 5.8 million cotton farmers, 40 to 50 million people engaged in textile related activities in rural and urban areas, particularly for un-educated, women & unskilled labour. Thus, the growth and all round development of this sector has a direct bearing on the development of the economy.

Amit Spinning was producing only Cotton Yarn with a capacity of 30672 spindles. During the period under review, the operations of Amit Spinning were badly affected due to shortage of Working Capital. Due to the financial constraints the Company operations had been suspended since 11th August, 2015. In addition to the above, the manufacturing unit situated at Kolhapur, Maharashtra stand closed with effect from 1st July, 2017 in accordance with applicable legal provisions due to shortage of working capital and closing of unit is a major jolt to the Company.

MANAGEMENT PERCEPTION ON OPPORTUNITIES, RISKS, CONCERN & OUTLOOK

The Indian government has come up with the Revised Restructured Technology Up gradation Fund Scheme (RRTUFS), 10% capital subsidy to the specified technical textile machinery, allowing 100% FDI in the Indian textiles sector under the automatic route may increase the profits in the coming years, the future of the Indian textile industry looks promising, buoyed by both strong domestic consumption as well as export demand. With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players. Further, the Textile Ministry has also introduced a new textile policy to promote value additions which sets a target of doubling textile exports in next 10 years.

The major factors hindering progress of the textiles industry are Increase in the power costs, higher transaction costs, high cost of labour and general increase in input costs, thus the industry has to concentrate on cost reduction exercises

and improvement in efficiency. Another key challenge presently is the Fiber/Raw Material cost, which is increasing abruptly and increase is not fully absorbed in the yarn prices and accordingly yarn spinners are hit the most in the entire textile chain. Due to fluctuating prices and uncertainties in the foreign exchange market, increase in power cost, introduction of GST and lack of adequate working capital, the EBITA levels may remain stagnant during the year.

Further, to overcome the losses promptly in this challenging scenario, the Management is keeping a close watch on various threats/risks facing the company and taking all appropriate steps to restart of manufacturing unit.

With much awaited / impending approval of Resolution Plan of the Company by NCLT and with the continued support and co-operation of company's bankers, management believes that your Company would again resume production, optimally utilize capacities, and generate increasing sales volumes, margins in due course and the management is confident of a turnaround of the company in near future.
