<b>Appropriations</b>		
General Reserve	-	30.00
Dividend	147.12	183.89
Dividend Tax	23.87	30.54

## Review of Operations

The company has produced 6,51,278 MT. of cement during the current financial year compared to the previous year production of 4,97,723 MT. of cement registering an increase of 31 %. The cement sold during the year under review stands at 6,38,449 MT. compared to 4,94,362 MT. during the previous financial year showing an increase of 29%.

The gross sales in terms of value during the year under review were at ₹ 22379.87 Lakhs as against ₹ 15147.05 Lakhs during the previous financial year translating into an increase of 48 %. Similarly the Profit Before Tax for the current financial year amounts to ₹ 129.49 Lakhs against ₹ 2079.31 Lakhs during the previous financial year. The profit after tax for the year under review stands at ₹ 57.61 Lakhs compared to ₹ 1168.93 Lakhs during the previous financial year.

As can be observed, there is a significant improvement both in the physical terms and financial terms during the year under review compared to the previous year. The main reasons for the steep fall in profit before tax during the year 2010-11 are as follows:

- a. The interest cost during the year has gone up to ₹ 2590.14 Lakhs compared to previous year amount of ₹ 533.75 Lakhs (an increase by ₹ 2056.39 Lakhs). This increase is basically on account of the interest on the project cost which is fully to be charged to Profit & Loss A/c during this year which was not there during the previous financial year.
- b. The higher depreciation during the year of ₹ 1274.78 Lakhs compared to that of ₹ 399.46 lakhs during the previous financial year ( an increase of ₹ 875.32 Lakhs) which is also due to the same reason as that of interest.

The company could achieve higher production and a higher sales value/turnover inspite of the fact that there is a steep decline in the prices of cement during the financial year compared to the previous financial years. As you may be aware, the drop in price realization is more significant in the state of Andhra Pradesh compared to the other markets in the country.

The cement industry, with its fluctuating fortunes, is known for abnormal variations in the prices owing to several reasons including the changes in demand for the product, supply side changes, increase in installed capacities, changes in the Government spending pattern, emphasis on infrastructure projects, political Situation etc. As the members are aware, during the year under review, there were several disturbances in the state of Andhra Pradesh which have had an adverse impact on the price realization as well as on cement off take.

The statistics available show that there is negative growth in AP for cement demand by about 12% during the year 2010-11 compared to the positive growth of 2.8 % in the year 2009-10 and positive growth of 19% during 2008-09. This negative growth has shown an adverse impact on the bottom line of the company, though there is a significant improvement in the sales turnover.

## Expansion Project

A mention has been made about expansion project taken up by the company in previous annual report. The company could achieve higher production during the year 2010-11 partly owing to the additional capacity created by the expansion project, however, owing to the reasons explained above the production has not yet reached the full capacity utilization due to the adverse market conditions and it is estimated that the year 2011-12 will witness a significant increase in both the quantity terms and in value terms as well as the profitability.

## Dividend

The Board of Directors of the company has recommended a dividend of ₹ 0.80 paisa per equity share of ₹ 10/- each for the year ended 31<sup>st</sup> March, 2011.
