## MANAGEMENT'S DISCUSSION AND ANALYSIS REPORT

### Overview

The company's major sources of revenues are from Agri input distribution and Retail operations. These generate revenues and cash primarily by the sale of fruits, vegetables, grocery and FMCG through retail outlets and Bio-pesticides & Bio fertilizers through distribution division. The company has geographic area of Andhra Pradesh and adjacent states.

### Industry Structure and Developments

The current macroeconomic environment continues to remain challenging in the backdrop of weak global economic environment. India's GDP forecasts have been lowered, with the reserve Bank of India now forecasting a GDP growth rate of 6.5% for fiscal 2012-13. The government has taken up the reform agenda and has initiated steps to increase FDI (Foreign Direct Investment) in sectors such as multi-brand retail etc.

During the monsoon season there were fears of drought like conditions due to deficient rains, which eased towards the end of the season with overall deficiency reducing to 8% of long term average.

The FMCG sector continued to report good volume led growth in revenues during the first half of fiscal 2012-13. Rural India, which contributes to a third of the overall FMCG sector continued to grow well driven by factors such higher MSPs (Minimum Support Prices) for agricultural produce, employment guarantee schemes and growth in services. Furthermore, aspiration levels continue to trend upwards with rural consumers demanding branded products. Recent reports indicate incremental consumption expenditure in Rural India has been significantly ahead of Urban India during the past few years.

### Opportunities and Threats

Though the overall scenario for the smaller companies is extremely competitive, there are some niche areas where there are some opportunities for growth. The management is exploring these areas to consider entering these areas and develop expertise in such areas.

### Outlook

The management is doing its best to forge relations with other companies and take the company forward in the new business lines. However, the outlook of the management is cautious in view of the competitive nature of the market.

### Risks and Concerns

Risk evolution and management is an ongoing process in the company. All key functions and divisions are independently responsible to monitor risk associated with their respective areas of operations.

While venturing into new business lines, the company would need access to funds. The risk of not being able to raise funds at the timer needed is the biggest risk that the management foresees.

### Internal Control Systems

The Company maintains a system of well established policies and procedures for internal
