**OPERATIONS :**

The year under review has been very disappointing for the Company. Due to extreme Competition from some big players, the operations at Company's L.P.G. Bottling Plant at Uluberia turned absolutely unviable and your Directors had no option but to stop Bottling Operations at this Plant from December, 1999 onwards. Subsequently after negotiations your Company leased out this Bottling Plant to M/S SHV Energy North East Ltd. (100% subsidiary of a Fortune - 500 Multinational Company) for a fixed period of 5 years through an Agreement signed on 21-3-2000 and during the Lease period the aforesaid Company will give a monthly lease rent of Rs. 1,75,000/- with all expenses and outgoings on their Account. The agreement with them also provides for an option to them to purchase the entire Uluberia L.P.G. Bottling Plant at a Fixed Price of Rs. 1.46 Crores at any time during the period of lease. This step was taken by your Board in the best interest of the Company as your Directors are of the firm view that small/ medium Companies will have no future in the LPG business due to entry of Multinational Companies and also of Public Sector Oil Companies not only in the domestic sector but also in the Industrial and Commercial Segments of the market. The aforesaid lease agreement was duly approved and ratified by the members in the Extra Ordinary General Meeting held on 20th April, 2000.

During the year your Board also closed down Company's Steel Tubes manufacturing Unit located at Serampore, Dist. Hooghly, West Bengal permanently in the face of continuous losses on account of supply heavily in excess of the demand and the resultant lower sales realisation per unit.

**ASHIRWAD STEELS & INDUSTRIES LTD.**

The decision of the Directors was in the best interest of the Company as this Unit was incurring losses and funds were required by your Company for Sponge Iron Project at Jamshedpur. Your Directors are exploring possibilities of either leasing out this unit or for an outright sale of the same. The Company's L.P.G. Bottling Plant at Raigarh is still surviving as it is not facing much competition as the big players have not yet entered in this part of the Country.

Financial performance of the Company during the year has been very dismal and your Company incurred losses for the first time. The total Income/Turnover of the Company during the year under review was Rs. 451.08 lacs (Previous Year Rs. 611.85 lacs). The net results for the year was a net loss of Rs. 6.70 lacs (Previous Year net Profit of Rs. 7.94 lacs). Your Directors are however very optimistic about much better performance in the Current Financial year as Company's Sponge Iron Plant has Commenced Production from April, 2000 with very satisfactory performance. The future outlook of the Company, therefore, is considered quite good.

**SPONGE IRON PROJECT :**

The Company's Sponge Iron Project (Phase-I) was completed in the month of March, 2000 and the process of taking out Trial Production commenced from the last week of March, 2000. Your Directors are pleased to inform you that this Project started Commercial Production from 5th April, 2000 and is working quite satisfactorily. The work of completing the Phase - II of the Project also commenced from April, 2000. The work on the 2nd phase is going on in full swing. Your Directors are making all efforts to ensure completion of phase - II by August of this year. After commissioning of phase - II the total installed Production capacity of your Company shall be 24000 M.T. of Sponge Iron per annum.

**DIVIDEND :**

To conserve resources for the ongoing sponge Iron Project, your Directors do not recommend any dividend for the year under review.

The Company has not accepted any deposit from the Public during the year.
