ITEM NO. 8

In terms of Section 23 of the Sick Industrial Companies (Special Provisions) Act, 1985, if the accumulated losses of an industrial Company, as at the end of any financial year have resulted in erosion of fifty percent or more of its peak net worth during the immediately preceding four financial years, that Company falls under the category of potentially sick Industrial Company and therefore the fact is required to be reported to Board of Industrial and Financial Restructuring (BIFR) within 60 days from the date of finalization of the audited accounts which is the date of this Annual General Meeting.

As per the audited accounts of the Company for the year ended 31st March, 2013 finalized and approved by the board on 30th May, 2013 subject to approval of shareholders, the accumulated losses of the Company as at 31st March, 2013 amounting to ₹ 215.09 Crores have resulted in erosion of more than fifty percent of its peak net worth of ₹ 234.14 Crores during the immediately preceding four financial years.

The Board is already seized of the situation arising on account of erosion of net worth and is taking the necessary steps including discussions with the lenders and a package of financial restructuring under the OTS mechanism which is under consideration with the secured lenders.

The reasons of erosion of net worth are briefly explained here under.

- The global meltdown, which started in September 2008, crippled the economic growth all over the world and as a result various infrastructure and non infrastructure projects were either put on hold or shelved.
- The large amount of working capital of the Company was invested in the oil division of the Company which ceased to be operative since 2008-09 due to which the value of such investments was reduced to a greater extent, subsequently major current assets of the Company were written off as non recoverable.
- The Company has large disputed receivables from MSEB (amounting to ₹ 157.09 Crores) and other municipal corporations and semi government bodies. In some cases, counter claims against the company have been filed by these agencies which have delayed

the recoveries. Coupled with a reduced turnover, this has made recoveries more difficult. The Company has issued legal notices in over 200 cases.

- In view of the above, the Company faced acute working capital shortage, which resulted in to under utilization of production capacity, reduction in sales, frequent staff turnover, The management tried to fill up the vacuum by raising short term debts but the same were consumed in supporting the fixed costs incurred by the Company.
- Due to non achievement of the break-even point and paucity of long term working capital, the Company continued to incur cash losses after the financial year 2010-11, which significantly erode the positive net worth of the Company.

Steps taken and proposed to be taken by the Management:

- The Company had filed a proposal with the Corporate Debt Restructuring (CDR) cell for the restructuring of its Bank Liabilities under consortium. The CDR proposal submitted by the Company was approved by the CDR Empowered Group Committee (CDR-EG) at its meeting held in March 2012. However, since the process consequent to such approval could not be completed, the concerned Banks did not execute the master restructuring agreement, therefore the CDR proposal has lapsed.

Now the Company has approached/is in the process of approaching individual Banks for settlement of their dues under One Time Settlement (OTS) basis.

- The Board has approved a scheme of arrangement with the shareholders and creditors of the Company, the company will transfer its non-core assets to reduce debt burden on the company
- The Company is focusing only on manufacturing of quality products in terms reliability and functionality. The Company has shifted its marketing function to hardcore marketing companies led by a teams of highly talented and experienced professionals. The company thus becomes ideologically a “contract manufacturing” company.
- The Company has established Budgeting system for effective cost control, The worker and employees strength is being rationalized to control the personnel cost.
- Besides the aforesaid, the company has also taken several steps for operational restructuring which are expected to lead to higher efficiency/cost savings.

The Board of Directors recommends the Resolution at Item No. 8 of the Notice.

None of the Directors of the Company is interested or deemed to be interested in the proposed resolution.

FINANCE

The enclosed statement forming part of the report gives details such as Financial Position at a glance, Distribution of Income etc. Your directors wish to bring the following to your attention:

The Company has a debt burden which its established sources of income and assets cannot service or repay. A detailed exercise had been carried out with the help of professional agencies and secured creditors in pursuance of establishing the viability. The reports inter alia conclude as under:

- # The unit is viable and business is feasible.
- # The Company needs equity infusion and debt restructuring or repayment at a discount.
- # The present realisable values of assets have eroded significantly.
- # The new initiatives taken for development and production of identified products on contract basis make the enterprise viable.

The above clearly indicates need for fresh fund raising and the debt restructuring. The relevant notes have been carried elsewhere in this report.

The Company had filed a proposal with the Corporate Debt Restructuring (CDR) cell for the restructuring of its Bank Liabilities under consortium. The CDR proposal submitted by the Company was approved by the CDR Empowered Group Committee (CDR-EG) at

its meeting held in March 2012. However, since the process consequent to such approval could not be completed, the concerned Banks did not execute the master restructuring agreement, therefore the CDR proposal has lapsed.

Now the Company has approached/is in the process of approaching individual Banks for settlement of their dues under One Time Settlement (OTS) basis.

INVENTORIES, RECEIVABLES AND CURRENT ASSETS

The management has done a detailed analysis of its current assets as reported in the previous year. For the reasons explained below, the board is of the opinion that the realizable value of assets has gone down significantly:

Inventories: The inventories include a large portion of products meant for oil division which has ceased to be operative and hence not realizable. Also a large volume of components, WIP remained unutilized for such products.

Receivables: The Company has disputed export receivables from M/s Westinghouse Lighting Corporation where a lawsuit has been lost and also other cases where quality counter claims and customers' reorganization have delayed recoveries. On domestic front, large number of debtors have raised counter claims. Coupled with a reduced turnover, this has made recoveries more difficult. The Company has issued legal notices in over 200 cases.

Advances: In many cases, the Company had advanced certain amounts for long term business contracts. The reconciliation for the individual parties is under process and once confirmed suitable action for recovery shall be taken.

In view of the above, current assets as stated above are not at realizable values as stated in the Balance Sheet
