ASSAM PETROCHEMICALS LIMITED

MANAGEMENT DISCUSSION AND ANALYSIS REPORT.

Industry structure and developments.

The Company is a manufacturer of two petrochemical products, Methanol and Formaldehyde. The profitability of the Company is largely affected by the international price of Methanol, which has direct impact on domestic Methanol prices. During the financial year the international market for Methanol showed an uptrend and reached up to 610/MT of Methanol and ranged during the year between USD 215 to USD 610. The prices are showing downtrend and the Methanol price at the time of this report stands at USD 360.

Opportunities and threats

The existing Methanol plant is now 20 years old and needs major revamping and increase in capacity to sustain itself in the competitive era. Breakdowns have increased due to ageing. The cost of production is much higher on account of small capacity and the above factors. Further with the shifting of Methanol and Formalin market to distant places on account of closure of BRPL's DMT plant and major plywood industries in the state, the Company has to compete with importers and indigenous manufacturers located in advantageous positions. For increase of Methanol capacity by 30%, the present allocation of natural gas would be sufficient. As a long term measure the Company has planned to undertake a 500 TPD gas based Methanol plant with state of the art technology for which a proposal has been submitted to the State Government.

Segment wise or product wise performance

Plants	2006-07	2007-08
100 TPD Methanol	81%	95%
100 TPD Formalin	79%	82%

CAPACITY UTILIZATION:-

In the financial year 2007-08, the company was able to achieve 95% capacity utilization of Methanol plant against 81% in the previous year. The capacity utilization of Formaldehyde plant was 82% as against the capacity utilization of 79% in the previous year.

Outlook

To utilize the available cheap allocated gas, reduce cost of production, strengthen 100 TPD Methanol plant and to avail NE incentives 30% expansion of the Methanol plant is under process. The consultant has completed the study and found it feasible from the technical and economic point of view to enhance the capacity of Methanol plant by 30%. There is continuous follow up for allocation of additional gas to set up 500 tons per day Methanol plant and 7MW captive power plant to ensure uninterrupted power for the production units. Further, development programs are being organized to invite prospective investors to set up downstream projects based on the Company's products.

Risks and concerns

The shifting of markets is exerting a big burden on the margins of the Company. The Company has no option but to sell its products in distant places for maximum utilization of its installed capacity. There is stiff competition for the products of the Company except northeast. The Company has to match the prices of competitors at customer point (who are close-by) by bearing the huge cost of transportation. It is

ANNUAL REPORT, 2007-2008

Assam Petrochemicals Limited

gathered that one Methanol plant is being set up in Tripura for which allocation of gas has been made by ONGC. This development is a serious concern for the Company. The Company shall evolve the strategy to enhance capacity of Methanol as already planned and also to add high value addition product based on Methanol to ensure its future success.

However, despite several steps taken to reduce the cost of production and to be globally competitive, the Company is prone to the Government policies viz. Gas pricing, NE incentives etc. The management is pursuing with the Government to be more rational for the North East Industry.

Internal control systems and their adequacy

The Company has an adequate internal control system strengthened by conducting internal audit by outside expert firm.

Discussion on financial performance with respect to operational performance

The financial and operational performance has been covered in the first part of the Directors' Report.

* Material developments in human resources/IR front, including number of people employed.

The Company has a surplus manpower against its limited turnover. The Company is preparing the blue print for proper utilization of manpower by extending the operations of the Company. Expansion plan has been submitted to the State Government. VRS is in force in the Company. The Company is operating for 30 years and the senior management personnel are due for superannuation. The Company has inducted some young professionals to meet the future needs of the Company and is reviewing the senior positions. Further Company has engaged a senior technocrat to strengthen its technical side as well as for effective manpower planning and utilization.

CORPORATE GOVERNANCE DISCLOSURE

1. Philosophy on Corporate Governance:

The company continues with its efforts to attain the highest levels of accountability and transparency in every aspect and in all interactions with its stakeholders including the shareholders and the state government and also with its employees. The company aims at satisfaction of all stakeholders in a balanced manner through sustainable growth and profitability.

2. Board of Directors:
