3. MANAGEMENT

j) Management Discussion and Analysis :

The activities of the company are limited and the size and the turnover is small. As such, the management discussions are an ongoing process and doesn't merit special mention. However, a gist of discussions and analysis is presented :

Industry Structure and development -

- The business is largely by way investment, yarn trading and Electrical Products Distribution.
- The yarn trading and consignment agent activity at Ichalkaranji is progressing smoothly.
- The company has ventured as a partner having 25% share in Biomass Briquetting plant in the name of 'Green Fuel Tech' having its plant at Chiplun, dist. Ratnagiri.
- It has under partnership in the name of 'Jai Mining Corporation' entered into mining agreement with a party in consortium with like minded company. A bauxite mine is being leased by the Government of Maharashtra to the party which shall be operated by our consortium. The consortium has been allotted a bauxite mine by the Government of Maharashtra. The Environmental Clearance & Approval process from the Union Ministry of Environment is being initiated. The consortium has also filed a review application with the statutory body for review of allotment of mining rights of 2 more blocks to other party in which the consortium was the first applicant.
- 'Shubh Labh Mines' is being closed since the clay sand for mining does not look any more remunerative.
- The company is also a co-promoter of 'Sunchemie Industries Pvt Ltd' Sri Lanka which is a registered company with ROC, Sri Lanka and has signed an agreement with the Board of Investment of Sri Lanka to put up a plant to manufacture Base Lube Oils by re-refining of Used and Waste Oils. The proposed project has got delayed due to delay in term loan arrangement. The proposed project is expected to take some form only after august, 2009.
- The company is a distributor for CFL, C-Lums & fans of Havells India Ltd. and these operations are accounts are maintained under Electricals Division. M/s. Energia Electrical Corporation is a working partner in this project and is entitled to 30% net profits. The business has limitation in terms of sales and growth. Further, considering that there is an associate who is also entitled to profits from the activity, the company has proposed to sell off the electrical division.
- The company has entered into a MOU with M/s. Shree Patil Minerals in consortium with other parties for Silica Sand Mining. The Silica Sand Mines has been allotted to M/s. Shree Patil Minerals by the Government of Maharashtra and the process of Environmental clearance is going on.

Opportunities and threats -

- Investment in shares has its pitfalls in terms of market conditions. It is also prone to error in judgement during investment in equity market.

- Amounts which have been lent to parties on call basis have threat of going bad. However, the amounts earmarked for specific projects are presently lent to parties of repute or to whom one of the Director know well.
- Yarn trading activity requires huge investment and recoveries of payment can be termed as a threat. However, due care is taken by selling the material largely through reputed brokers. Generally, advance payments are to be made to Mills for booking yarn. This may also be termed as a limited risk.
- Electricals Division operations have limited growth potential. Credit of a month or above have to be given to Retailers who are the customers of the company since the sales are limited to sales by distribution network. There are reasonable chances of non-recoverability of amounts. However, as a practice, a collection executive is appointed whose primary job is to collect due payments. This reduces the threat of the amounts going bad considerably.
- The amounts invested / proposed to be invested in Sri Lanka project M/s. Sunchemie Industries Pvt Ltd have a risk in terms of the project not taking off at all.
- The investment along with consortium partners in M/s. Shree Patil Minerals can be considered a threat since the mining can start only in case environmental clearance from the Union Ministry of Environment. For the same, a public hearing is also conducted by the Authorities to seek views of the Local people in the panchayat where this mines is located.

In terms of opportunities, investment in shares can give reasonable returns if invested pragmatically. Yarn activity is a sustaining business and hence can provide business opportunity. The Sri Lankan project can yield high returns. Green Fuel Tech has given decent returns on the investment of the company. The Silica Sand mines is a high return opportunity with long term prospects of at least 20 years considering the total estimated reserves in the mines.

Segment wise performance –

- The company has booked reasonable income from investment in shares and from interest income.
- This year has been good for yarn business and the company has earned decent profits there.
- The Electricals Division has taken shape. However there is limitation in growth and sales due to structure of the business.

Outlook –

The yarn business is encouraging and so is the investment in shares. Electricals Division will give sustained income. The Sri Lankan project still lacks fair amount of clarity in terms of the project taking shape. The Briquettes activity in which the company is a partner is expected to do good.

Risks & Concerns –

The primary concern is security of advances given. Hence, all new advances are given on the basis of personal standing of the party in the market and any one of the Director personally knowing the concerned party. There is concern in receivables in yarn business and reasonable care is taken.

There is a concern relating to present investment in Sunchemie Industries P Ltd, Sri Lanka in case the project doesn't come up.

The advances to M/s. Shree Patil Minerals are non-refundable in case of proper surface rights being arranged by them of the lease mining area and the approach road to the mines. Then, if the environmental clearance gets delayed, there could be substantial concern of the advances paid to them.

Internal control systems & its adequacy –

The audit committee meets once around every 4 months. As the size of business is small, more meetings have not been necessary. Further, due to appointment of a full time Chief Executive, internal controls are observed. Also, Internal audit is conducted routinely.

Financial performance wrt operational performance –

The company has had a good profit this year due to income from yarn and electricals division. The operational profit (EBITDA) is Rs. 29.76 lakhs.

Development in HRD –

Since the manpower required is not more than 15, no HRD department is made.
