The overall performance of the company has been satisfactory during the year under review. The turnover of the Company during the year under review has jumped by 7.23% inspite of adverse market conditions. The Profit before tax has also gone up marginally to Rs. 115.41 lacs. During the year under review the market prices of the Fertilizers were under pressure due to severe competition. The Fertilizer Industry as a whole was not performing upto its expectations due to failure of 4 successive monsoons. The Demand for Fertilizers remained to be stagnant due to serious draught conditions prevailed in Maharashtra, Madhya Pradesh, Chhattisgarh etc. Inspite of the above adverse conditions your company managed to register the remarkable growth in the sales as well as in the profitability, due to hard work of the marketing team the company. The cost cutting measures adopted by the company as well as consistant improvement in quality of the products to the satisfaction of the farmers are the main factors for the better performance of the company. The seed division has also performed well during the year and the popularity of the Seeds developed by the Company has shown upward trend.

b) CURRENT AND FUTURE OUTLOOK

SSP is poor man's fertilizers and has got great future in India. Various field studies conducted proved that the soil in most parts of India is sulphur deficient. SSP is the only fertilizers which provides the vital nutrient like Sulphur and Calcium. With the present consumption of SSP fertilisers it can meet only 15 % of the requirement of phosphate and Government is encouraging the use of SSP fertilisers so that its consumption can be increased significantly. This will be beneficial to the company. Due to increased quality consciousness by the Government, the competition from unit producing poor quality fertilizers has been reduced and it is advantageous to the company, as we supply the quality fertilizers at the competitive prices to the farmers. It is predicted that this year the monsoon will be normal and we expect that the sale of fertilizer during Kharip 2004 will grow remarkably.

The seed division is showing good progress and the sweetcorn 'Amarican Sweetcorn Sanjivani Gold' developed by the us has been well accepted due to its high sweetness and tenderness. The company has got the germ plasm bank for the sweetcorn. It has also developed 296 varieties of Sorghum as well as many varieties of Cotton and the same has been well accepted by the market.
