DIVIDEND

The directors don't recommend any dividend for the year.

OPERATIONAL HIGHLIGHTS

During the year under consideration our Company achieved a turnover of Rs. 655.65 lacs as compared to Rs. 828.55 lacs during the previous year. The Company maintained its gradual improvement in performance this year too. As compared with an annual O.K. production of 6752 Sq. Mtrs. in 1998-1999 and 10390.33 Sq. Mtrs in 2000-01, the company recorded an annual O.K. production of 11602.66 Sq. Mtrs. in 2001-2002. Likewise as compared with an average rejection of 11.6% in 1998-1999 and 6.09% in 2000-2001 the average rejection was brought down to 2.95% in year ended on 31/03/2002.

The major problems faced by the company during the year 2001-02 were related to :

- A. Shrinking market
- B. Crashing Prices

The September 11, destruction of the twin towers of World Trade Centre in New York had a shattering impact on business globally. To be blunt demand collapsed rather than shrank. The effect was felt in the Indian Marketplace too. To make matters worse slashing of CDOT orders almost destroyed the PCB industry in India.

The collapse in custom saw the onset of a savage price war among the Indian PCB manufacturers. That means on the one hand the demand was collapsing and on the other prices were crashing. In a such scenario survival with improved performance did not inflate our profits. Rather it has had the effect of minimising our losses.

Globally markets are picking up. International demand for PCBs is rising. Locally CDOT no longer has the buying muscle power to keep the PCB Industry alive. However the energy meters market has seen rapid expansion which may assist in keeping the PCB industry afloat in the short term. However, from a long term perspective we have to establish tie ups with Overseas buying houses to ensure long term growth and profitability.
