INDUSTRY OVERVIEW

The latest slowdown in growth of emerging market countries and higher inflation levels, combined with domestic supply and infrastructure constraints, have reduced India's annual inflation-adjusted gross domestic product (GDP) growth from a high of 10.3% in 2010 to 4.4% in 2013, according to the International Monetary Fund (IMF). India was the third-largest economy in the world in 2013, as measured on a purchasing power parity basis. Risks to economic growth in India include high debt levels, infrastructure deficiencies, delays in structural reforms.

Primary energy consumption in India has more than doubled between 1990 and 2012, reaching an estimated 32 quadrillion British thermal units (Btu). The country has the second-largest population in the world, at more than 1.2 billion people in 2012, growing about 1.3% each year since 2008, according to World Bank data. At the same time, India's per capita energy consumption is one-third of the global average, according to the International Energy Agency (IEA), indicating potentially higher energy demand in the long term as the country continues its path of economic development. In the International Energy Outlook 2013, IEA projects India and China will account for about half of global energy demand growth through 2040, with India's energy demand growing at 2.8% per year. Your Company endeavors to utilize its full capacity so as to fulfill the increasing demands in the domestic market and earn profits in near future.

HUMAN RESOURCES

Your Company strongly believes that employees are central to the Company's transformation agenda and that it is important to build capabilities of employees to handle both current and future needs. During the year, the Company worked extensively on identifying the needs of employees across all categories and level. The Company has built a young and vibrant team of qualified and competent professionals to meet the emerging business challenges and market competition.

RISK AND CONCERNS

The Company has to mainly depend on foreign suppliers for import of CRGO and CRNGO. Any delay in procurement of the same would impact the financials of the Company. However, the Company has tied up with major players and has developed a strong relationship with these suppliers. Further, increase in the prices of Electrical Steel would also have an impact on the bottom line of the company. However, it is an established pattern of the company that any escalation in the cost is passed on to the customers to ensure that margins are not affected. While this is the broad understanding with the customers, they may not absorb the increase in raw material cost to full extent at all times and it may not be with immediate effect in all situations.

CAUTIONARY STATEMENT

Actual results may vary from those expressed or implied, depending upon economic conditions, Government Policies and other incidental/related factors.
