India's seafood exports are targeted to rise to \$ 4 billion for the current year, up from \$ 2.8 billion which was achieved in 2010-11. MANAGEMENT DISCUSSION & ANALYSIS

A. INDUSTRY, STRUCTURE, DEVELOPMENT AND OUTLOOK.

Aquaculture will continue to expand in all continents in terms of new areas and species, as well as intensifying and diversifying the product range for species and product forms. The tragic earthquake and accompanying tsunami in Japan is affecting world markets for sea food. After a strong rebound in 2010, the current year looks likely to set new trade records for shrimp due to strong demand and rising prices. However, the perceived slower growth in US and Europe may affect strong demand and the rising prices to some extent.

B. OPPORTUNITIES, THREATS, RISKS AND CONCERNS

As there is stagnation in the growth of shrimp exports, any strategy to achieve US\$ 4 billion target by 2013-14 should focus on this important item of marine products export basket. With renewed demand for marine products from US who have been affected by BP Oil spill in Gulf of Mexico and India's policy of allowing L. Vannamei shrimp aquaculture, shrimp is expected to contribute better in the total marine products export. India has already allowed culture of L. Vannamei (White leg shrimp) by importing brood stock from Thailand, USA etc. Due to its very high productivity, ability to sustain high stocking density the culture of this species is expected to spread rapidly resulting in higher productions and export volumes.

Disease is by far the most serious threat to the sustainability of shrimp farm production. In Asia various viruses caused devastation in many countries. Much has been said about the relationship between intensity and disease, but extensive and semi-intensive producers have also been affected in recent years. Poor feed quality may reduce growth, depress health and survival, reduce water and pond soil quality, and increase pollution. Poor water quality, caused by acid sulphate soil conditions, pollution or the presence of disease organisms may reduce growth, depress survival and introduce disease. Among other technical threats, slower growth in the US and Europe are perceived to be major threats in the near term.

As part of cleaning of Balance Sheet, your directors have embarked up on the reduction and restructure of capital last year. During the current year Shrimp Farm had been given for 26 months lease. Further, as part of operationalising the Farm, the management has substantially improved the infrastructure for future operations. Your promoters with more than four decades experience in the field of tobacco and commodities trading are observing the volatile conditions of the markets to carry on trading operations in commodities. The company and promoters recognize the need for managing the business risks effectively for producing significant returns.

C. INTERNAL CONTROL SYSTEM

An effective internal control system and all controls are continuously reviewed and risks of inaccurate financial reporting and fraud, if any, are dealt with immediately and eliminated.

The company has a well established system of internal control in operation which complies with the relevant provisions on ‘ Internal Control ’ under the Company’s Auditor’s Report Order 2003 and as prescribed under revised clause 49 of the Listing Agreement with stock exchanges.

The status of implementation of recommended solutions are regularly reviewed and presented to the Audit Committee of the Board.

D. FINANCIAL PERFORMANCE

The financial statements are prepared in compliance with the requirements of the Companies Act, 1956 and Generally Accepted Accounting Principles in India. The management accepts the responsibility of integrity and objectivity of the financial statements and the basis for various estimates and the judgements used in preparing the financial statements.

During the year ended 31st March, 2011 the company achieved a turnover of Rs. 37.25 lakhs against the previous year of Rs.17.06 lakhs. During the year, the company had given it’s Farm for a short term lease. Near Hatchery the company carried out farming operations to maintain its assets and also improved its infrastructure in Farm. However the company could just meet its expenses and incurred a marginal loss of Rs. 0.65 lakhs.

E. CAUTIONARY STATEMENT

Statements in this report, particularly those which related to management decision and analysis, describing the company’s objectives, projections, estimates and expectations may constitute “forwarding looking statements” within the meaning of applicable laws and regulations. Actual results might differ materially from those either expressed or implied.

DELISTING OF SHARES:

Company's Ordinary Equity shares are originally listed in the Stock Exchanges of Mumbai (BSE) and four other Stock Exchanges at New Delhi, Kolkata, Chennai and Hyderabad. The shares of the company are compulsorily traded in dematerialized form. The Board considered that continued listing on all stock exchanges is not necessary and therefore decided to de-list from Delhi and Calcutta stock exchanges in pursuance of special resolution passed in the 14th Annual General Meeting held on 28th September, 2007. The company since made an application for delisting of its shares in Delhi and Kolkata stock exchanges and the matter is under consideration of these Stock Exchanges.

APPRECIATION:
