DIRECTORS' REPORT TO THE MEMBERS

Your Directors present before you the 25th Annual Report together with Audited Accounts for the year ending 31st March 2011.

Operation and Future Prospects

This year's overview has to be studied with caution. The Global melt down and recession backed by the continuing crude price hike gave a significant hit to the Indian economy last year. The GDP growth rate has fallen down to 7.40% in 2010. The Indian economy was resilient to the impact of the recession in the western world. With the government giving support to the industry through its stimulus packages, the economy came back to its high growth trajectory of 8.7%, however, this was short-lived and we had started facing, food and then non food inflation. The RBI had to intervene and is still trying to fight it. To add to this, was Middle East political crises, which lead to crude shooting up, resulting in increased subsidy bill for the country. The effect of all this had resulted in increasing interest rate and so it had started affecting all interest rate sensitives and infra projects. Quite a number of projects have been put on hold or delayed. Indian Economy is facing a typical problem of having to manage between high inflation and fast economic growth. We are hoping on good monsoon and the cooling down of the crude price. It may take couple of quarters to again start moving on the growth trajectory.

The office premises of the Company at 13, India Exchange Place, Kolkata-700001 collapsed on 3/2/2011 leaving no assets, records, etc. recoverable.

MANAGEMENT DISCUSSION & ANALYSIS REPORT

Overview

This year's overview has to be studied with caution. The Global melt down and recession backed by the continuing Crude price hike gave a significant hit to the Indian economy last year. The GDP growth rate has fallen down to 7.40% in 2010. The Indian economy displayed little impact of the recession in the Western Economy. With the government giving support to the industry through its stimulus packages, the economy came back to its high growth trajectory of 8.7%. However, this was short-lived and we had started facing food and then non food inflation. The RBI had to intervene and is still trying to fight it, to add to this, was Middle East political crises which lead to crude shooting up, leading to increased subsidy bill for the country. The effect of all this had resulted in increasing interest rate and so it had started affecting all interest sensitive and infra projects. Quite a number of projects have been put on hold or delayed. Indian Economy is facing a typical problem of having manage between high inflation and fast economic growth. We are hoping on good monsoon and the cooling down of the crude price. It may take couple of quarters to again start moving on the growth trajectory. It is expected that the GDP shall grow @ 8% to 8.5% this year. We may see more IPO's, FPO's from private sector and PSU's.

The Global economic situation will keep the capital markets turbulent and volatile.

Opportunities and Threats

The economy is looking up for the timely and good monsoon this time. This, together with proper stock supply management will help in controlling inflation. With the resolution of political crisis in the Middle East in near future, we should see crude cooling down. This will help in bringing down the energy bill and will also help in controlling cost inflation. It is expected that the GDP will grow @ 8% to 8.5% this year. We should see again moving on the fast growth trajectory by the end of third quarter.

The key threats include the change/slowdown in implementation of the policies of the Government. Indecisiveness of the Govt. because of political pressures, changes in tax structure, failure to contain actual inflation within a reasonable range, high inflation rate, increasing interest rates, governing rules of SEBI and RBI etc., which may affect the capital market substantially.
