DIRECTORS' REPORT TO THE MEMBERS

Your Directors present before you the 26th Annual Report together with Audited Accounts for the year ending 31st March 2012.

Operation and Future Prospects

The Global melt down, Euro zone crises and recession backed by the continuing crude price hike gave a significant hit to the Indian economy last year. The GDP growth rate has fallen down to 6.5% in 2012. The Country had started facing, food and non food inflation. The RBI had to intervene and is still trying to fight it. It had to increase interest rate 13 times in rapid succession to check inflation. The effect of this had resulted in a slowdown in the economy. This has started affecting all interest rate sensitive and infra projects. Quite a number of projects have been put on hold or delayed. The rising oil prices and the fall in the value of Rupee, mounting pressure on the subsidy bill, negative balance of payment are posing a continuous threat to the economy. Indian economy is facing a typical problem of having to manage between high inflation and fast economic growth. Further the inability of the Govt. to pursue reforms and implement its policies because of its political compulsions, scams and issues of corruptions, in activeness of Govt. machineries has brought the business confidence levels to its lowest. This has resulted in a substantial decrease in the capital inflow. We are hoping on good monsoon and the cooling down of the crude price. This if coupled with a strong Govt action on policy implementation may take couple of quarters to again start moving on the growth trajectory. The Govt. expects to maintain the growth rate of the economy at about 7% for the current year. Both the capital markets and the interest rate markets are expected to remain volatile in near future.

Management Discussion & Analysis Report

Overview : The Global melt down, Eurozone crises and recession backed by the continuing crude price hike gave a significant hit to the Indian economy last year. The GDP growth rate has fallen down to 6.5% in 2012. The Country had started facing, food and non food inflation. The RBI had to intervene and is still trying to fight it. It had to increase interest rate 13 times in rapid succession to check inflation. The effect of this had resulted in a slowdown in the economy. This has started affecting all interest rate sensitive and infra projects. Quite a number of projects have been put on hold or delayed. The rising oil prices and the fall in the value of Rupee, mounting pressure on the subsidy bill, negative balance of payment are posing a continuous threat to the economy. Indian economy is facing a typical problem of having to manage between high inflation and fast economic growth. Further the inability of the Govt. to pursue reforms and implement its policies because of its political compulsions, scams and issues of corruptions, in activeness of Govt. machineries has brought the business confidence levels to its lowest. This has resulted in a substantial decrease in the capital inflow. We are hoping on good monsoon and the cooling down of the crude price. This if coupled with a strong Govt action on policy implementation may take couple of quarters to again start moving on the growth trajectory. The Govt. expects to maintain the growth rate of the economy at about 7% for the current year. Both the capital markets and the interest rate markets are expected to remain volatile in near future.

Opportunities and Threats : The economy is looking up for the timely and good monsoon this time. This if coupled with a strong Govt action on policy implementation may take couple of quarters to again start moving on the growth trajectory. The Govt. expects to maintain the growth rate of the economy at about 7% for the current year. Cooling down of crude will help in bringing down the energy bill and will also help in controlling cost inflation. It is expected that the GDP will grow @ 6.5% this year. We should see again moving on the fast growth trajectory by the last quarter of the financial year.

The key threats include the change/slowdown in implementation of the policies of the Government. Indecisiveness of the Govt. because of political pressures, changes in tax structure, failure to contain actual inflation within a reasonable range, high inflation rate, increasing interest rates, governing rules of SEBI and RBI etc., crises in Eurozone, which may affect the capital and debt market substantially.

Business Segment Analysis : During the period under review the Company's activities were mainly restricted to Capital Market and related fields. However the company has made investments and disinvestments in Equity Shares, trading and dealings in G Secs, Corporate Bonds and other debts instruments. The Company's Debt Desks in Mumbai has started to cater large corporate clients, Banks & Institutions, Provident Funds, Trusts etc.
