OPERATIONS:

Your Company mainly operates in one segment i.e. “tyres” with a focus on manufacture of wide range of “Off-Highway Tyres”. These specialty tyres are meant for Agricultural, Industrial, Material Handling, Construction, Earthmoving (OTR), Forestry, Lawn & Garden Equipments and All Terrain Vehicles (ATV). More than 90% of our revenue is generated through exports.

In spite of severe global economic slowdown during the last financial year, your Company has registered an overall growth of over 12% in its revenue compared to previous year i.e. Net Turnover and other Income from Rs.1,257 Crs. to Rs.1,413 Crs.

In terms of gross margin, the year under review is considered to be one of the best years for the Company, mainly due to the lower input cost and better foreign exchange realization. The gross profit has increased from Rs.164 Crs. to Rs.378 Crs. – a phenomenal growth of over 130%. The Company enjoyed the benefits of low input cost for the first half of the financial year, after which it has started firming up.

Your Company continues to enjoy the status of “**STAR TRADING HOUSE**”.

DIVIDEND:

Your Directors have declared Interim Dividend of 70% as against 60% during previous year. Total payout on account of Interim Dividend and tax thereon has been Rs. 15.78 Crs. during the year.

The Board has decided to treat said Interim Dividend as Final Dividend for the financial year 2009-10.

CAPITAL EXPENDITURE

During the year, with a view to streamline the manufacturing process and improve overall efficiency at its all the locations, the Company has incurred Capital Expenditure of Rs. 133 Crs. This covers investment in new premises for the Company's corporate office.

To meet the growing demand for “BKT” tyres and to be in line with Company's vision to become a key player worldwide in the field of “Off-Highway Tyres” your Company has decided to set up a Green Field plant near sea-port at Bhuj in the state of Gujarat. This will be the fourth Tyre manufacturing facility of your Company. The Plant will be set up in various phases. For the 1st Phase the capital expenditure is estimated to be Rs.900 Crs. and is likely to be commissioned by December 2012.

Directors' Report

In order, to meet the growing demand the Company also plans to incur capital expenditure of Rs.150 Crs. during 2010-11.

OUTLOOK FOR THE CURRENT YEAR 2010-11:

Though the atmosphere of recession and uncertainties is still looming large across the globe, your company saw signs of improvement in its business in the third quarter of last financial year and witnessed good growth in the last quarter of previous year. The company is aiming at sustainable growth by expanding its base - through developing new product lines, venturing into new geographies and deeper penetration into existing markets. To augment this growth plan, your company has announced a major capital expenditure plan to increase its production base, which will be commenced during current financial year.

The down side to the current financial year is an unprecedented increase in input costs – be it raw materials, freight or power and fuel. This volatility is mainly driven by speculation and supported by excessive liquidity in the market place. To resolve this, your Company has initiated price increase of its products, however it may not be sufficient to fully absorb the effects of input cost increase. In view of this Company's margins are expected to be under severe pressure.

OPPORTUNITY & THREATS:

OPPORTUNITIES:

The segment in which your company operates is predominantly known as "large variety-low volume" - a segment that restricts optimal capacity utilisation. It is both capital intensive as well as labour intensive, making it un-attractive for fresh investments by major players. Your Company is fully geared up to take advantage of the peculiarities of the said segment and has developed a large base of SKUs (Stock keeping units) to meet the diverse needs and applications.

Moreover, the segment is not exposed to any technological obsolescence and wild fluctuations in demand of its products.

The Company has an opportunity to develop the "Earth Moving Tyres" (OTR) markets and take advantage of the shift from bias to radial tyres, which is picking up pace rapidly. In this pursuit, the company has already set up an all-steel OTR Radial tyre plant at its Chopanki location and thereby become the first company in India to set up such plant. Your company is in the process of expanding its base in various sub-segments like agricultural, industrial, construction, mining, winter and solid tyres under both the technology – bias as well as radials.

THREATS:

Like any other Company, your Company is also exposed to various threats like competition from small players, retention of employees, labour unrest, increase in raw material prices and other input costs etc.

RISKS / CONCERNS AND RISK MITIGATION:

Fluctuation in Raw Material prices: The Company's major raw material is Natural Rubber, which is an agricultural commodity and actively traded on the commodities exchanges. Its prices fluctuate significantly and have moved up considerably in the recent past. The future outlook for this commodity is hard to predict, and it would be difficult to estimate what level of further increase could take place. The prices of other raw materials have also moved up sharply in the recent past and currently ruling at very high levels affecting the margins of the company adversely.

Though the Company enjoys pricing power, however, it is not possible to pass on the increase to the full extent. Moreover, it happens with some time lag. Thus, the Company has to bear the brunt of the said fluctuations to some extent.

The increase in utility cost and other administrative costs may also affect the profitability of the company adversely.

In order to mitigate such risks, the Company not only enters into medium-term contracts but also adopts the policy of "Stocking" large quantities during the lean period.

Labour Relations: Since the nature of Company's manufacturing process is that of batch processing, it requires lot of skilled as well as un-skilled workers. Maintaining a huge work force is a big challenge.

In order to minimise the said risk, the Company follows good HR practices and spends lot of money and Management's time for their welfare, safety and to improve the quality of work environment. All workers are paid more than adequate remuneration for their work.

Retention of skilled manpower: This is not a unique area of concern for the Company as there is a significant shortage of skilled manpower in the industry. The rate of attrition is high.

The Company is able to manage the said risk by good HR practices and rewarding its employees handsomely.

Currency fluctuation: Since approximately 90% of the Company's revenues are generated through exports and the Company also imports lot of its raw materials and capital equipments; it is exposed to risks due to currency fluctuations.

The Company follows the system of hedging its receivables and major payments well in advance by entering into Forward Contracts, thereby protecting itself largely from fluctuations in currencies.

INTERNAL CONTROL SYSTEM AND THEIR ADEQUACY:

The Company has adequate system of internal controls to ensure that all the assets are safeguarded and are productive. Necessary checks and balances are in place to ensure that transactions are adequately authorised and reported correctly. The Internal Auditors of the Company conduct Audits of various departments to ensure that necessary controls are in place. The Audit Committee of the Board reviews these and the management, where needed, takes corrective actions.

HUMAN RESOURCES:

The Company's human resources continue to be the biggest asset of the Company. The team has remained as committed as ever and produced results that are considered significant. Quality, quick delivery and focus on resolving customer issues are the hallmark of the team performance. There is a strong focus on TEAM spirit. During the year, many events were conducted to develop the personality and outlook of its employees. Employee relations continue to be cordial.

SUBSIDIARY COMPANIES:

The company has following subsidiary companies:

Balkrishna Paper Mills Limited (100%), Balkrishna Synthetics Limited (100%), BKT Tyres Limited (80%), BKT Exim Limited (100%), and Indirect subsidiary Companies i.e subsidiary Companies of BKT Exim Limited; i.e. BKT (EUROPE) Ltd., BKT EUROPE S.R.L. and BKT (USA) INC.

As required under the Listing Agreement with the Stock Exchanges, a Consolidated Financial Statement of the Company and all its subsidiaries is attached. The Consolidated Financial Statement has been prepared in accordance with Accounting Standard AS-21 issued by the Institute of Chartered Accountants of India, and form part of the Annual Report and Accounts.

The Company has been granted exemption for the year ended 31st March, 2010 by the Ministry of Corporate Affairs from attaching to its Balance Sheet, the individual

Directors' Report

Annual Reports of its subsidiary companies. As per the terms of the Exemption Letter, a statement containing brief financial details of the Company's subsidiaries for the year ended 31st March, 2010 is included in the Annual Report. However, these documents will be submitted to any shareholder wishing to have a copy on receipt of such request. These documents will also be available for inspection by any shareholder at the Head Office of the Company. However as directed by the Central Government, the financial data of the Subsidiaries Companies have been furnished under 'Details of Subsidiaries' forming part of the Annual Report.
