OUTLOOK FOR THE CURRENT YEAR 2015-2016:

The Company's earnings are mainly generated through exports to various countries across the globe. Due to recessionary trends prevailing across the globe, the business environment is tough and challenging. However, your company will continue to make sustained efforts towards growth.

The long-term prospects of the company are definitely positive and the company continues to expand its product range by widening its products offerings and venturing in to new geographies.

OPPORTUNITY & THREATS:

OPPORTUNITIES:

Your company operates into a segment predominantly known as "large varieties -low volume segment", which is not only capital intensive but also labour intensive. Your Company is fully geared up to take advantage of the peculiarities of the said segment and has developed a large base of SKUs to meet the diverse needs and applications.

Moreover, this segment is neither exposed to any technological obsolescence nor wild fluctuations in demand for its products.

The Company has incremental opportunity to develop "Earth Moving Tyres" (OTR) markets and take advantage of the shift from bias to radial tires, which are growing up rapidly. In order to take advantage of this opportunity, the company has already set up an all-steel OTR Radial tyre plant at its Chopanki location and proud to be first company in India to set up such plant. Your company is in the process of expanding its base into its various sub-segments like agricultural, industrial, construction, mining, winter and solid tyres under both technologies – bias as well as radials.

THREATS:

Like any other Company, your Company is also exposed to various threats like competition from small players, retention of employees, labor unrest, increase in raw material prices and other input costs etc.

RISKS / CONCERNS AND RISK MITIGATION:

Fluctuation in Raw Material prices: The Company's major raw material is Natural Rubber, which is an agricultural commodity and actively traded on the commodities exchanges. Its prices fluctuate significantly and have witnessed significant volatility in the past. Recently there has been a softening in the prices of natural rubber and other raw materials which are expected to continue for some more time in the backdrop of subdued business environment across the globe.

In order to minimize such risks, the Company not only enters into medium-term contracts but also adopts the policy to "Buy and Stock" large quantities during the lean period.

Since most of the raw materials are imported, the company is exposed to foreign currency risk. However, it enjoys natural hedge as most of its revenues are in foreign currency.

Labour Relations: Since Company's manufacturing process is that of batch processing, it requires lot of skilled as well as un-skilled workers. Maintaining a huge work force is a big challenge.

In order to mitigate the said risk, the Company follows good HR practices to promote the welfare, safety of its workmen and improve the work environment. All workers are paid more than adequate remuneration for their work.

Retention of skilled manpower: Like other players in the industry, the Company is also exposed to this risk, more particularly when there is shortage of skilled manpower in the industry.

The Company is able to manage the said risk by good HR practices and rewarding its employees handsomely.

Currency fluctuation: As stated earlier the company revenues are mainly generated through exports. The Company also imports lot of its raw materials and capital equipment's. Moreover, all its borrowings are in foreign currency and it is therefore exposed to risks due to currency fluctuations.

The Company follows the system of hedging its receivables (net off payables) well in advance by entering into Forward Contracts, thereby protecting itself from the fluctuations in currencies.
