During last year your Company's Sales and other Income grew by 8.84% over previous year primarily on account of volume growth in Plastic Container Divisions at Mumbai & Chennai.

Unabated increase in prices of main raw materials viz. Polymer and Steel in the first half of the financial year for both Divisions coupled with general price increase in all consumable items and packing materials had an adverse impact on the net margin of your Company's products. At the beginning of the second half of the financial year just when the Company's sustained efforts to pass on to the Customers the impact of all round increase in input costs were about to fructify, the raw material prices nosedived due to fears of global recession. This resulted in company being saddled with high priced inventory of raw material. This coupled with the selling prices crashing and demand slump caused the Company to post substantial financial losses. Frequent power disruptions both at Mumbai and Chennai as also with deterioration in quality of power and higher cess eroded the margins further. Unexpected depreciation of rupee in 2008 further resulted in unprecedented foreign exchange losses of Rs.401.02 Lac (net) on imports.

DIVIDEND

In view of the losses incurred by the Company, the Board of Directors do not recommend any dividend payment for the year ended on 31st March, 2009.

OPERATIONS

CLOSURES DIVISION

The performance of the Closure Division both in terms of Production & Sales in the 1st half of the year was affected primarily due to shifting of operations of this division from Chembur to Turbhe and time taken for stabilization of plants and processes. By October' 08 when stabilization of production including the expanded capacity was visible, the economic conditions in both local and international market deteriorated beyond

expectation resulting in demand from exports almost disappeared in last quarter of the year. The production and sales during the year were lower at 14.53 million sets and 13.81 million sets as against 17.99 million sets and 18.22 million sets respectively, representing a drop of 24 % over last year. The trend in the last quarter in particular was quite discouraging. The total sale in value term was also lower at Rs.3512 Lac vs Rs.3602 Lac. The price of steel, which is the basic raw material, kept on increasing during 1st half and then nosedived to its' lowest level in third quarter and after a period of volatility became stable in the last quarter.

PLASTICS DIVISION

Performance of Plastic Division in Physical terms especially in Valerex 200 and Valerex 20 had shown sizeable improvement during last two months of the financial year after a sudden slump in sales during third quarter. This gave an indication that at least in domestic market the impact of global recession was reversing. In case of Blow Moulded Products and Smart Pack Division (Pails) the operations were strategically restricted to limited niche and high value customers only. During the year Production of all products were partially disrupted due to work on capacity expansion of Valerex 20 and Valerex 200 being carried out simultaneously. Product-wise performance is dealt with below:

V20

The demand for this product continued to grow except for sudden drop in local demand during third quarter with the additional demand forthcoming both from the existing customers as also new customers and new segments. Although production remained at the same level as last year, sales improved by 10%. The sales in value term increased from Rs.1575 Lac to Rs.1861 Lac i.e., an improvement of 18% over the previous year.

V200

The performance of this product in physical terms in spite of slump in sales during third quarter remained more or less at last year's level due to remarkable recovery during last two months of the financial year. The Company has attained highest ever production and sales during last two months and the trend continues. The sales during the year in value terms increased primarily on account of high selling prices from Rs.3607 Lac in previous year to Rs.3863 Lac representing an increase of 7%. With the trend of increased demand continuing in current year and additional capacity being fully utilized the next year's performance is expected to be better.

BLOW MOULDING

With the addition to production capacity after commissioning of one more Blow Moulding Machine in March, 09, and addition of new customers this product line showed a modest growth. The Company strategically preferred to restrict the production to only high value segments and serve niche customers rather than compete in low margin areas. The sales revenue increased from Rs.353 Lac to Rs.464 Lac.

PAIL

The production and sales of this product was downsized strategically and was restricted to very few niche customers and thereby cut down on fixed cost and improve overall profitability rather than compete for volume with suppliers with thin margins.

PLASTIC CONTAINER DIVISION - CHENNAI

During the current financial year under report both production and sales from this unit has shown marked improvement. However constant increase in polymer prices and other consumable costs, high power cost due to sharp power cuts and inability to pass on the entire increase in cost to customers due to cut throat competition have resulted in loss of Rs.145 Lac.

49th Annual Report 2008 - 2009

CLARIFICATION ON AUDIT REPORT

The statutory auditors in their report to the members at point no.17 have mentioned about the short term funds to the extent of Rs.1953.73 Lac being used for Long term purposes as at 31st March, 2009.

As mentioned in the last report the Company had received an advance of Rs.1439 Lac from Hindustan Petroleum Corporation Limited ("HPCL") towards sale of Chembur Land on signing of Record of Understanding in August' 07. Pending the execution of formal sale agreement this advance is being reflected as "Sundry Creditors" under the head 'Current Liability' in financial accounts as at Balance Sheet date. This amount was utilized for meeting expenses towards shifting of Closure Division to Turbhe and capacity expansion of Closure Division. Similarly Capital expenditure to the tune of Rs.702.83 Lac arising due to capitalisation of assets also reflected as "Sundry Creditors" under the head "Current Liability" as on Balance sheet date. These two factors are the reasons for note in Auditors Report.

SHIFTING OF CLOSURE DIVISION

As informed to the members at the last annual general meeting the Steel Drum Closure Division has been shifted to a new location at MIDC Turbhe in August, 2008. This division has become fully operational at new location from October'08. Simultaneous to the shifting, the Company has also completed capacity expansion of this Division. The capacity of this Division after expansion stands increased from 18 million sets to 35 million sets on three shift basis.

The sale transaction with Hindustan Petroleum Corporation Limited (HPCL) could not be completed before 31st March, 2009 due to procedural constraints. However the sale transaction is completed on 29th April, 2009 with physical possession of vacant property being handed over to HPCL and balance sales consideration of Rs.1323 Lac has been received from HPCL.
