OPERATIONS:

The period under review turned out to be difficult for the company characterised by adverse

economic and business conditions. The company's performance suffered set back mainly on account of sluggish demand conditions, increase in interest and other expenses associated with launch of new products in the premium segment, lower realisation, increased competitive activity in the market place pushing up support expenditure to maintain market position thereby impacting profitability. The curtailment of flour mill operations continued during the period due to mismatch of realisation of wheat products and wheat prices also restricted sales growth and contributed to adverse financial results.

The company has initiated various proactive steps to counter these unfavourable trends through significant marketing initiatives in the form of innovative product launches and new introduction of premium products having potential for volume growth, improved packaging, continuous focus on achieving total market penetration of existing products, emphasis on aggressive marketing strategies to gain competitive edge, planned thrust on developing overseas market and above all various measures to bring down the cost of operations.

After continuous slump in the economy, the market is now showing signs of recovery and your Directors are confident that with the proactive measures initiated, the performance of the company would improve in the coming years.

The turnover and other income during the 18 months period under review amounted to Rs.11,358 lakhs compared to increased turnover and other income for the previous year on an annualised basis resulting in performance not in line with the envisaged business plans.
