2. OPERATIONS REVIEW:

Total income from operations during the year under review was Rs. 492.86 crores as compared to Rs. 518.28 crores in the previous year signifying a fall by 4.90%. During the year under review, Company suffered a loss of Rs. 8.06 Crores as against Profit After Tax of Rs. 3.59 Crores in the previous accounting year. This was the result of global recession followed by crash in the metal prices by more than 35%.

Company has implemented expansion plan at its unit at Wada which is yet to be operative in full capacity due to lack of demand and working capital.

In order to improve financials, Company is seriously planning to raise long term resources by diluting its valuable assets and utilize the same for improving operations of the Company.

Company's products continues to be well accepted by the market. Company has participated in tenders floated by govt. undertakings and is poised to receive large orders to be executed during next 2-3 quarters. Due to renewed thrust on Infrastructure sector by the newly formed government at the centre, it is expected that the demand for steel may pick up in coming quarters.

3. DIVIDEND

In view of loss, no dividend has been recommended by the directors.

4. SUBSIDIARY COMPANY

As required under section 212 of the Companies Act, 1956, the Audited Statement of Accounts along with the report of the Board of Directors of Bhuwalka Steel Industries (UAE) FZE and Benaka Sponge Iron Pvt Ltd. together with the Auditors' Report as at and for the year ended 31st March, 2009, are appended.

5. CONSERVATION OF ENERGY:

Total energy consumption and energy consumed per unit of production as per Form 'A' is annexed - forming part of this Report.

6. TECHNOLOGY ABSORPTION:

The Company is keeping abreast of the latest developments in product technology, manufacturing process and methods and using indigenous technology

7. FOREIGN EXCHANGE EARNINGS AND OUTGOINGS:

Management Discussion and Analysis

Industry Structure & Developments:

The Company's primary product, steel rolled product, is primarily cater to the demand of construction, infrastructure, power and engineering industries. There are large no. of re-rolling mills across the country who are largely local player.

During the year under review, the steel prices were very volatile. In the 1st half of the year, prices touched historic high and in later part of the year crashed by about 35%.

The price of rolled products is market driven and to sustain margins. Company continuously makes efforts for reduction in the cost of production and overheads. Company is also putting up efforts to have wider product range under one roof for meeting needs of discerning customers. In this direction, Company has implemented modernization and expansion at its facilities at Wada.

OPPORTUNITIES, THREATS AND CONCERNS:

Deep economic recession coupled with global meltdown has affected all the commodities market across the globe and steel was one of the worst affected commodity. Due to difficult condition for financial closure and fund raising program of projects of large magnitude, the demand scenario is not clear. However, for country like India, there will be good opportunity for growth though may be lower than earlier targets and renewed emphasis on infrastructure by the newly formed stable government may work as stimulus for the industries at large.

Competition from un-organised sector is a threat to the Company. However, renowned builders and infrastructure companies are keen to source their requirement from organized company like ours. Moreover, company's better structured product portfolio will enable it to penetrate into new markets and met the requirements of existing customers.

Price volatility remain serious concern of the Company. Company has to initiate necessary steps to mitigate this risk.

Outlook:

The year ahead looks uncertain as demand side is not very clear and new capacities are in the pipeline. Company is catering to requirements of Housing, Power, Telecommunication and Engineering Sectors. Large integrated plant mainly focus on flat products and long products are generally the domain of secondary steel makers like us. A growth rate higher than the global industry average has been envisaged in the national steel policy. The long term goal of the country is to become self reliant and globally competitive in steel sector.

Risks and concerns:

The cost of power (including fuel) and its availability is major concern. High power tariffs and volatility in input prices may adversely affect the profitability of the Company. However, it is not significant considering the level of operations of the Company and normal correlation in the price of raw material and finished goods. High volatility in commodity prices remain serious concern. Company is also exposed to financial risks like exchange fluctuation and interest rate variations. Management is identifying these risks and taking necessary steps to mitigate the risks. Company has taken insurance cover for all its fixed assets.

Internal control systems and their adequacy:

The Company's internal control systems and procedures are adequate and commensurate with the size and nature of Company's operations. Company has sufficient procedures that form part of internal control system which provide for check and balances.

Cautionary Statement:

This report contains forward-looking statements which are based on certain assumptions and future events. It cannot be guaranteed that these are accurate or realized in future. Company's actual results may materially differ from those projected in forward looking statements. The reader should bear this in mind. Further, Company undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.
