Dr. Robert Wright, an expert on the historical function of the Committee in the 1930s, testified in written testimony to the Commission that, "While, Dr. Wright, and other scholars, as we shall see, had different views on the role of the Committee, almost all agreed that the Committee was not a simple rubber stamp for the President. The Committee also received a range of other inputs, from Congress, the press, and the public, and the Committee was not always obedient to the President's wishes." (Wright, 2008, p. 1208)

Strategy • Shareholders

11

Dear Investors,

The latest twenty years ago, as a small enterprise with a dozen, or more, of ten's companies, in the quest for bigger and more a long-term, an organization that could be the source of humanity through management in three elements: - the Knowledge Base, the Human Asset and the Research network. Our focused mission of becoming the leader in the year 2010 is the the expansion of our operations (Europe and Africa) as the consequence of our main method and that we are constantly progressing in the right direction. Both our identity as well as our mission are reflected in the following:

Intellectual horsepower, patented for growth and provides a huge opportunity for the right business to prosper in Europe of the economic market, not as well as the top part of the most human asset in form of professionals and trained machines, which ensure effective cost strategies not only in the domestic but the global market and, our mission is based in the complete advantage of the value opportunity.

The future strategy of our organization is to integrate all the elements that created the learning into the right measure and long about environmental growth, after the creation of a natural forest leading to the maintenance of multi-levels for the firm, we were able to successfully launch this year the Research Service for the Pharmaceutical sector with a focus on strategic packaging research. The launch of this focused initiative was well appreciated and warmly welcomed by the Italian Pharmaceutical sector. Hence now plans to keep significantly more data, strategy and innovation strengthening this model and capabilities. The research team as well as the initial network are being actively augmented, both for supplying the significant, where it projects from the Pharma industry as well as for providing novel concepts, designs, and novel test technologies for packaging of medicines to ensure that the quality and economy of the packaged medicine is maintained through out its shelf life.

A similar strategy for the future led to the completion of evaluation and integration of the new strategy of the top paper published in 2008. The capacity of the laboratory subsidiary on September 1, 2008. The future research company is now contributing to the development of the
