### Management Discussion and Analysis Report

#### (a) Industry Structure and Developments

Traditionally, the sanitaryware industry in India was divided into two categories—the organized sector and the unorganized sector. With the opening up of Indian economy, a third category has also emerged that of imported sanitaryware. Not to be outdone by this segment, almost all manufacturers in the organized sector have started importing premium sanitaryware and marketing it in their own brand name or under the original brand name. In order to accelerate the growth, the companies are increasing their range of products.

During the current year, the Company has introduced several new products, like bath fittings, glass basins, etc. This is apart from the shower range, which got expanded by addition of new models and also the Sanitaryware range, which saw the inclusion of several new premium ranges.

The Company also continued to add CERA Bath Studios (Company Display Centres) in three more cities. In all, now six Bath Studios are functional—at Ahmedabad, Chandigarh, Bangalore, Kolkata, Kochi and Hyderabad.

#### (b) Opportunities and Threats

The growth in housing construction throughout the country offers great opportunity for the Company. The increasing brand consciousness amongst the consumers will help Company fare better in the years ahead, supported by its concerted and continued efforts in brand promotional activities.

The increasing imports of sanitaryware and the likely commencement of new sanitaryware plants in the country, can cause a threat to the growth rate of the Company. The sanitaryware manufacturers in the unorganized sector continue to enjoy duty exemptions, which is not conducive for healthy competition, while those in the unorganized tiles industry have already been brought on parity by the Government long back.

#### (c) Outlook

With the Government policy of continuing tax benefits on housing loans and the increasing number of shopping malls in all towns give an ample opportunity to the Company. The construction rate is expected to grow for at least 4 to 5 years.

The Company continually upgrades its technology, to improve its yield and quality, in order to be competitive in the market place. Ceramic technologists from abroad are hired for improving the productivity. Also, installation fuel-efficient kilns has been taken up by the Company. One such shuttle kiln has already been commissioned in the current financial year.

Similarly, the Company is also gradually evolving to be a total bathroom solutions provider, from a mere sanitaryware manufacturer over the last couple of years. This transformation will continue in the coming years, with the additional newer products in the bathroom category.

#### (d) Risks and Concerns

Any drastic change in the Government Policy may affect the sanitaryware manufacturers.

#### (e) Internal Control Systems and their adequacy

The Company has adequate system of internal control relating to the purchase of stores, raw materials, plant & machineries, equipments and various components and for the sale of goods commensurate with the size of the Company and the nature of business.

The system of internal control of the Company is adequate keeping in mind the size and complexity of your Company's business. Systems are regularly reviewed to ensure effectiveness.

#### (f) Financial performance with respect to operational performance is discussed in the main part of the Report.

#### (g) Material Developments in Human Resources / Industrial Relations

The Company continues to invest in training and education of its employees and has been organizing various training programmes from time to time. It had also availed the services of "Leadership Management International(LMI)", Waco, Texas through their Indian associate "Unnati Institute of Leadership"

**Cera Sanitaryware Limited**
