## Full commitment

In a challenging market environment, strong companies look for opportunities to gain strategic advantage, maintain stability and drive long-term growth. They strive to recommit themselves to their core purpose...their stakeholders. At CMI FPE, we have done just that.

Amidst the economic turmoil of the past year, we continued to focus on the fundamentals of our business. We made a number of process improvements to increase operational efficiency and expanded our geographic reach to South East Asian and African markets while leveraging our expertise to provide operational and maintenance services in order to diversify and stabilize our revenue streams.

Our full commitment is to enhance value for all our stakeholders while conducting business safely, in a socially, environmentally and ethically responsible manner.

# Message from Chairman

Dear Shareholders,

Jean-Marc Kohlgruber's leadership and foresight as Chairman of your Company from June 25, 2008 to July 30, 2014 guided us through some exceptionally challenging years. I would like to seize this opportunity to thank him for his valuable guidance and commitment throughout all these years.

This being the first year for me to reach out to all of you, I take this opportunity to share my view and outlook on your Company.

While announced as a financial year in "combat mode", in FY 2013-14 the expected growth did not materialize and, in spite of the unfailing commitment of the teams, growth continued to be sluggish in FY 2014-15. The country's metals & minerals sectors are desperately hoping there is no further reversal in fortunes next year. However various investor reports show that India's growth will continue to remain slow but hopefully stable.

While India's growth invites considerable global attention, we are hoping for an economic revival as promised by the new reform-focused government. There has been a significant sentiment change with the prospect of a stable Government for the next five years and one hopes that during this financial year we will see some definitive measures to bring back confidence and restart investment cycle and job creation.

During this slowdown scenario, CMI FPE has increased its focus on customers, leadership and talent, and is being better organized to serve customers while reducing structural costs.

In order to continue to remain abreast with the market scenario, your Company has consolidated its processes, procedures and

systems with regard to plant capacity for better lead time and operational efficiency. Existing structures and routines have been reinvented through targeted and explicit interventions.

Simultaneously there is an intent to shift from a product focused to a more customer focused orientation. Your Company is now geared up to provide operational and maintenance services to not just CMI supplied equipments but also to cater to the equipments of third party by way of technological upgrading and development of new products and accessories.

CMI FPE is also tapping into new growth markets like South East Asia and Africa, which are slowly emerging. Market entry into Bangladesh, after a long hiatus, proves that your Company's products have good acceptability, recognition and value.

After the intensive commitment which characterized FY 2014-15, success in the upcoming financial year will depend on your Company's capacity to pull out the same stops: operational and commercial efficiency, enhanced technological solutions and value added services, and growing geographical reach.

Hopefully FY 2015-16 will be the year of change for the better, driven by your Company's commitment, improving local market conditions and the support of your customers. Furthermore, your continued support and confidence, for which I warmly thank you, will help us to put our objectives into action and to propel us towards our overall goal: making a better future for CMI FPE.

Yours Sincerely,

Jean Jouet

After the intensive commitment which characterized FY 2014-15, success in the upcoming financial year will depend on your Company's capacity to pull out the same stops: operational and commercial efficiency, enhanced technological solutions and value added services, and growing geographical reach.
