Cairn has demonstrated a **long term commitment** to India over 15 years of investment and throughout 2008 it continued to build on the foundations for its future.

The **commencement of oil production** from Rajasthan will initiate a period of transformational growth for the company as we **target 175,000 bopd** from the Mangala, Bhagyam and Aishwariya fields.

We are also confident that our new frontier exploration position in **Greenland** has the potential to provide further **transformational growth** in the years to come.

Rajasthan Development Overview

The size and scale of our development in the Rajasthan desert is significant by anyone's standards, the construction and infrastructure figures alone speak for themselves

3,111 km²

The total acreage of our Field Development Area is nearly the same area as New Delhi and London combined

Fact

Approx 500 km of intra field and inter-field pipelines and 80 km of inter field roads have been built, comparable with laying a new road from London to Brighton.

Previous page

The export pipeline runs 600 km from the Rajasthan desert to the Gujarat coast. Export of production via the pipeline is due to commence in Q4 2009.
