OPERATIONS

The Company achieved only 58% of the previous years turnover on an annualised basis due to two major factors viz. introduction of mandatory registration formalities in some of the West African Countries in which your company had extensive market share and due to quality and process problems that were encountered in the manufacture. The fall in prices of some of the key generic products, which the company was exporting, had also resulted in higher material consumption resulting in very low margins. Although the company has registered its products in various countries in South America, which underwent downturn during last year, continued to be sluggish with very high erosion in margins. These had resulted in piling up of stocks in the form of work in progress and finished goods as well as outstanding in the form of receivable which in turn resulted in non servicing of debts causing additional interest burden.

OUTLOOK

In order to get over the Registration and approval and other formalities in the West African Countries, your company has evolved a two pronged strategy, the first being your company has started registration of products in these countries and the second, has entered into strategic alliances with local distributors and major users in these countries and have helped them to install packing and labeling facilities. This would help your company to export bulk formulations (semi-finished goods) with lesser lead-time.

Your company has helped these importers in identifying proper machinery, layout and training of marketing personnel. Company has also deputed key marketing personnel to help these companies to follow up on marketing and commercial activities.

Your company in order to improve its quality, throughput, maximum use of its capacity in various sections of its facility has also entered into an arrangement with a leading pharmaceutical company in Chennai to support the company in all these spheres which would help the company in the long run to shore up its revenue, contribution and servicing of debts and investors.

FINANCE

Due to reasons stated above, the company could not service its debts, which had resulted in additional interest burden. The company has proposed a restructuring scheme to the Bankers, which is under active and favourable consideration of the bankers.
