CHAIRMAN

MANAGEMENT DISCUSSION AND ANALYSIS

As management of the company offer readers of financial statements this narrative overview and analysis of the financial activities of the company for the financial year ended 31st March, 2011. We encourage readers to read the information presented here in conjunction with additional information that we have furnished in the financial statements, which follow this narrative.

A. INDUSTRY STRUCTURE AND DEVELOPMENTS

The global economy weakened as growth moderated in both advanced economies and emerging market economies (EMEs) under the impact of high oil and other commodity prices, spillover from the Japanese natural disasters and monetary tightening in EMEs to contain inflationary pressures. The Indian economy however continued to outperform most emerging markets during 2010-11 retaining its position as the second fastest growing economy, after China, amongst the G-20 countries. China and India contributed nearly a quarter of the incremental world output. GDP growth decelerated to 7.8 per cent in Q4 of 2010-11 from 8.3 per cent in the previous quarter and 9.4 per cent in the corresponding quarter a year ago. For the year as a whole, GDP growth in 2010-11 was 8.5 per cent. The growth during 2010- 11 reflects a rebound in agriculture and sustained levels of activity in industry and services. However, high energy and commodity prices may impact output and investment climate, and pose a threat to maintaining high growth at a time when the investment momentum may be slowing down. Certain factors do provide support to the growth process.
