shortly. RBI has presently fixed a ceiling on the amount of individual transaction at Rs. 1.00 lac.

In view of the advantages available for payment through ECS, you are advised to opt for it and return the Mandate Form duly filled in and signed alongwith a xerox copy of a leaf of your cheque book bearing your bank account number to the Investor Service Centre at the earliest. 2. Share Capital

The Company had issued on October 14, 1997, 390 lac Convertible Warrants of Rs. 10 each to its core promoters which were convertible into equity shares on or before April 13, 1999. Accordingly, the Company allotted 390 lac equity shares of Rs. 10 each at a premium of Rs. 1.63 per share on April 12, 1999 on conversion of the above warrants. The equity share capital of the Company has thus increased to Rs. 406 crores.

3. Dividend

The Directors recommend dividend of Rs. 1.40 as compared to Rs. 1.25 per share declared last year. The total outgo on this account will be Rs.57.03 crores.

4. Retention Price

The members are aware that urea price is regulated by the Government of India through fixation of uniform Consumer Price and Ex-Factory Price for individual

manufacturing unit under the Retention Price Scheme. Your Company had applied to the Fertiliser Industry Coordination Committee (FICC) of the Government of India for fixation of Final Retention Price for urea manufactured at Gadepan Plant. The Government of India, Ministry of Chemicals and Fertilisers has notified on January 28, 1999, a Revised Provisional Retention Price of urea effective January 1, 1994. The Company has accordingly revised the credit taken in the past periods on account of Retention Price Support and also accounted for the Retention Price Support during the current year on the basis of this revised Provisional Retention Price. The matter is being pursued with the Government for early fixation of Final Retention Price.

Consequent to the issue of the report of the High Powered Fertiliser Pricing Policy Review Committee set up by the Government of India to review the existing Retention Price Scheme for Urea, the Government is examining various alternatives to arrive at a Long Term Fertiliser Pricing Policy. Your Company hopes that the Government will not take any step, which will be detrimental to the overall health of this vital and core sector industry.

5. Plant Operation

The production of urea during the year 1998-99 was 9.57 lac MT representing a capacity utilisation of 123% as against 9.70 lac MT in the previous year. The lower production is due to major planned turnaround of the entire plant taken during March-April 1999. After the turnaround, the plant is operating very satisfactorily.

6. Marketing

The agricultural sector registered an impressive growth during 1998-99. Advance crop production estimates released by Agriculture Ministry indicate a total food grain output of 200.88 million tons, mainly due to higher production levels of rice, wheat and pulses. On the other hand, output of coarse cereals viz. maize sorghum, bajra and other small millets grown in rainfed conditions has fallen. The oil seeds and sugarcane have also surpassed previous years' production levels. The attractive minimum support price of Rs. 550 per quintal has boosted the procurement drive of wheat in northern states.

During the year 1998-99, your Company sold 10.38 lac tons of Fertilisers comprising of 10.03 lac tons of Urea (including 0.23 lac ton of imported urea) 0.34 lac ton of Single Super Phosphate and pesticides valued at Rs. 10.92 crores. The Company did not import any

DAP during first three quarters of 98-99, in view of uncertainty regarding quantum of additional adhoc concession for phosphatic fertiliser which was finally announced as late as December, 1998. The Govt. introduced in the current financial bill, 5% custom duty on the import of DAP and Urea. In order to encourage and ensure balanced use of fertilisers, the Govt. must take a long term view on concessions to phosphatic fertilisers. The MRP of Urea was enhanced by the Government from Rs. 3660 per ton to Rs. 4000 per ton with effect from January 29, 1999.

The Company reaches out to our valued farmers through a strong marketing network of 750 dealers and over 13000 village outlets to ensure timely supply of agri-inputs and technical assistance. The Company is making special efforts to ensure balanced use of nitrogenous and phosphatic fertilisers to increase food grain production in the country.

7. Capital Projects

a) GADEPAN II

The expansion programme to double the capacity of the fertiliser plant at Gadepan at the Project Cost of Rs. 1256 crores is progressing ahead of schedule and expected to go on stream by October 1999. After the commencement of this plant, your Company will become the largest producer of Urea in the private sector. The introduction of a 5.5% custom duty (inclusive of surcharge) on capital imports in the current finance bill had virtually no impact on our project since the procurement of most of the equipment had taken place before the introduction of this levy.

b) JOINT VENTURES

A Joint Venture Project being set up in Morocco at an estimated cost of US\$ 228 million in collaboration with Office Cherifien Des Phosphates (OCP), a Moroccan Government company is progressing satisfactorily. The plant is expected to go on stream by August 1999.

Your Company proposes to set up a Joint Venture Project in India in collaboration with M/s. Technico Pty. Ltd., Australia to produce miniature potato seeds at an estimated project cost of Rs. 50 crores. The Company has already received Government of India's permission for foreign collaboration.

d) HOUSING FINANCE

Your Company has taken over M/s. ITC Classic Home Finance Ltd. (ITC CHF) through purchase of 100% equity

share capital of ITC CHF. ITC CHF was a subsidiary of ITC Classic Finance Ltd., which was amalgamated with ICICI Ltd. This acquisition has been done with a view to enter the housing finance business, which has a high growth potential. The incentives given by the Government in the last budget will provide additional fillip to this sector.

e) SOFTWARE DIVISION

India Software Group (ISG), the Software Division of the Company has commenced its activities from Chennai. ISG has recently been awarded a contract by OCP, Morocco. During the year, various training programmes were conducted for sharpening and developing human skills with the prime objective of achieving corporate goals and at the same time providing opportunities for professional development of the employees to keep them abreast with the fast changing business environment. The Company has taken steps for the recruitment and training of employees for the expansion project. The employee relations continue to remain cordial and harmonious.

13. Social Work and Rural Development

Your Company endeavours to meet rising social expectations of the community around Gadepan and has undertaken various social activities like building and repair of roads, boring of tubewells, free medical check-ups, immunisation, provision of facilities like ambulance, fire tenders etc. The Company is actively associated with local administration in family welfare schemes and organising sports and cultural activities.

In the areas of IT based systems, the potential items vulnerable to Y2K are : application software, system software, computers and networking. Most of the application software in use are Y2K compliant. For the balance, necessary action has been initiated and these are expected to be Y2K compliant by October 31, 1999. For computers and networking, the Company is in the process of engaging an external agency to check all the IT equipment for Y2K compliance. The Company is in the process of obtaining certification of Y2K compliance from all its critical suppliers.

ii) The total cost of checking and remediation for Y2K Problem is not expected to exceed Rs. 25 lacs.

iii) Despite all our Y2K remediation efforts, any unforeseen problem on account of Y2K problem is not expected to affect our business operations in a significant manner. The computer based processing in

your Company is semi automatic with sufficient manual checks and controls and since most of the software packages have been developed in-house, we possess requisite technical competence to handle any eventuality.
