FROM THE CHAIRMAN
Dear Shareholders

DR. Y.K. HAMIED
Chairman

I am addressing you with humility and great pride as we celebrate the 80th anniversary of Cipla. We have completed eight decades of valuable service in healthcare, not only in India, but worldwide. This year also marks my completing over 55 years of active association with Cipla. As long as I can add positive value to the company, whether scientific or business-related, I will continue to do so and be with you.

Our pharma industry looks after the healthcare needs of our nation and that of many other countries. We are a major producer and supplier of affordable drugs worldwide. Many countries are dependent on India for their drugs. Now that our Indian pharma industry is at the forefront of healthcare, the Government should be fully supportive. Any further dilution in the Patents Act will adversely affect not only India but several countries which depend on India for their medicines.

Even though we are setting up manufacturing bases abroad, India will still be our major production base. Thanks to our strong brand equity and the relentless drive of our sales and marketing people, Cipla is the preferred choice of doctors in many key therapeutic areas, whether they are specialists or general practitioners, whether they practice in urban or rural India. To maintain our leadership involves hard and sustained work at all levels.

So how do we stay ahead as a company?

The only way is by investing in R&D, in innovation and in our people. For the past few years, we have put in a great deal of effort, time and money in these critical areas; the results of this will be evident in the near future. Last year, we spent over 6% of our turnover in R&D. The projects taken up are all carefully planned and accountable. We have invested in newer technologies like biotech, stem cells, nano technology, continuous flow chemistry. Collectively, we must build the best-in-class organisational capacity to make our aspired future come to life.

You will appreciate that no company can manufacture everything. We have therefore entered into many licensing agreements with other companies. This is in line with our mission to provide access to affordable essential medicines.

We have a separate Cipla Global Access Program (CGA), which concentrates on four key therapy areas. These are HIV/AIDS, Malaria, Multiple Drug Resistant TB and Reproductive Health. Our aim is to reach out to 80 million patients in these four therapies by 2020.

In keeping with our strategy for the future, we launched a new division called Cipla New Ventures (CNV) to build newer innovation-led businesses. This also involves manufacturing and marketing biotech products for cancer, respiratory, diabetes and auto-immune diseases.

Even as I conclude I must re-emphasize that Cipla will continue to serve patients across the world with the same passion and commitment that we have since our inception some 80 years back. The best is yet to come for your company. I am confident that going forward the journey of Cipla will build on the legacy we have and create a new future of more hope, greater success and deeper purpose. As we see a transformation to the next generation of the Hamied family, I have no doubt that in Samina Vaziralli we have a trustee who will preserve, inspire and enhance the spirit that we call Cipla.

A handwritten signature in black ink, appearing to read 'Y. K. Hamied', with a horizontal line underneath it.

Dividend

The Directors recommend a dividend of ₹2 per equity share (100%) for the year 2015-16. The dividend, if sanctioned at the Annual General Meeting, will be paid to those members whose names appear in the Company's Register of Members on Wednesday, 14th September 2016. In respect of shares held in dematerialised form, the dividend will be payable on the basis of beneficial ownership as per details furnished by National Securities Depository Limited and Central Depository Services (India) Limited.

Directors' Report *contd.*

MANAGEMENT DISCUSSION AND ANALYSIS: 2015-16 Global Business Review

Sales and Other Income (Standalone)

With a vibrant presence globally, Cipla is well-poised for growth that advances its goal of ensuring affordable access to healthcare for all.

To build a concrete foundation for sustainable long-term growth, the Company is investing heavily in its pipeline, making choices with respect to its operating model in certain markets and exploring initiatives to simplify the business. The financial year under review has been important for the Company to drive execution of these choices and enhance the resilience of its business model.

The Company's revenue from operations on a consolidated basis during the financial year 2015-16 amounted to ₹13,678 crore against ₹11,345 crore in the previous year, recording a growth of 20.6%. The income from operations for the Company's domestic business increased by 5.9%, from ₹4,825 crore in the previous financial year to ₹5,111 crore in the financial year under review. Total exports increased by 36.4% during the year to ₹8,261 crore. During the year under review, EBIDTA margin reduced by 0.8 percentage points. This was primarily due to the change in product mix, higher investments in research and development, and ongoing complexity reduction initiatives. Profit for the year increased by 27.5% to ₹1,506 crore from ₹1,181 crore in the previous financial year.

India Ratings and Research Private Limited, a Fitch Group Company, assigned a Long-Term Issuer Rating of IND AAA with a stable outlook to the Company. The

rating is the highest assigned in Fitch's rating scale and indicates the highest degree of safety regarding timely servicing of financial obligations and lowest credit risk.

No material changes and commitments have occurred after the close of the year till the date of this Report, which affect the financial position of the Company.

India

As one of India's leading pharmaceutical companies, Cipla is in a strong position to fulfill its commitment to provide modern and affordable medicines to patients. This year, despite pricing challenges and the impact of a weak monsoon, Cipla's domestic revenues for its prescription business grew by 16% compared to the industry growth of 14%, as per IMS Health data.

The India business contributed ~40% to overall Company revenues, with new products contributing 4.5% of total India business revenues.

The prescription business accounted for 81% of India business revenues and market share for this segment currently stands at 5.3%. The Company grew faster than the market in Anti-infectives, Gastrointestinal and Urology. The respiratory business saw strong uptake with over 20% growth in the COPD portfolio.

Cipla continues to focus on high-value opportunities to build out its specialty portfolio, through a mix of in-licensing and in-house innovation and development. In-licensing gained

momentum in FY 2015-16 with 6 deals executed in oncology, respiratory and dermatology segments. The Company also initiated several high value innovation projects, of which a few are likely to be commercialized in FY 2016-17.

With the successful launch of Sofosbuvir in India for the treatment of Hepatitis-C, Cipla has expanded access to the drug with nearly 10,000 patients being treated under the brand name HepCvir in its first 12 months. Cipla continues to build out its Hepatitis franchise in order to improve access to breakthrough therapies for patients with HepCvir + Ledipasvir / Daclatasvir combinations.

Cipla also entered new areas through a partnership model – Cutisera in cosmetology, Nasovac S in vaccines and Reteplase in the Anti-Thrombolytic segment.

In the coming years, the domestic business will continue to focus on enhancing depth of portfolio in priority therapy areas, and increasing sales

force productivity with the rollout of Customer Relationship Management (CRM) and Sales Force Automation (SFA) systems.

Through this, Cipla aims to grow above market rate of growth and strengthen leadership position in priority therapy areas in the Indian market.

South Africa

Cipla is one of the largest pharmaceutical companies in South Africa, with a private market share of more than 5%. South Africa contributed 11.5% to the overall revenues on a consolidated basis. The business however was impacted due to the depreciation of the South African Rand in FY 2015-16. In local currency terms, South Africa business revenue has grown at ~25% in FY 2015-16 against the previous year. Cipla's private market business has grown at 14% for the same period, with market leadership in the Respiratory, CNS and Oncology segments, and contributes over 60% of South Africa business revenue. The sales

and distribution arrangement with Teva Pharmaceuticals (Pty) Ltd, an affiliate of Teva Pharmaceutical Industries Ltd., has gained traction through FY 2015-16 with strong performance on products such as Copaxone, further cementing the Company's status as a preferred "Partner of Choice". Cipla has also introduced low cost vaccines in the South African market through an exclusive agreement with the Serum Institute of India. This is in line with the Company's goal to advance healthcare for all in South Africa.

Cipla also won Government tenders in antiretrovirals (ARV), respiratory and newer areas such as mental health, cardiovascular and women's health categories, achieving significant growth in the tender business over the previous year. The newly set up state-of-the-art distribution centre facility has doubled the Company's existing capacity and conferred competitive advantage by helping to improve customer service levels, enhance compliance, and reduce the cost of distribution.

Directors' Report *contd.*

Growth in Profits

(Standalone)

Capitalizing on its defined future portfolio, key development and in-licensing projects, and streamlined global organizational structure, Cipla South Africa will continue to leverage synergies from its international family. The Cipla brand inspires trust and has become a household name among consumers, pharmacies, prescribers and key opinion leaders. Going forward, several Sub-Saharan markets will also be covered by the South African organization.

North America

In the last quarter of financial year 2015-16, Cipla successfully completed the acquisition of two US-based entities, InvaGen Pharmaceuticals Inc. and Exelan Pharmaceuticals Inc. in a transaction valued at US\$ 550 mn. InvaGen Pharmaceuticals is a high volume generics business platform that provides Cipla with a strong US-based manufacturing setup and access to large wholesalers/retailers in the US. The platform includes 42 approved ANDAs and ~30 pipeline products that are expected to be approved over the next 4 years. It also has filed 5 potential first-to-file products which is expected to bring tremendous value in the coming 5-6 years. There are no material overlaps in the business, and the current portfolio and the pipeline is largely complementary to Cipla's products. InvaGen Pharmaceuticals' manufacturing footprint spans ~350,000 sq.ft. of GMP area with 3 units located in Long Island, New York, and a total production capacity of 12 billion tablets.

Exelan Pharmaceuticals is a sales and marketing company with a focus on generic pharmaceuticals for the government and

institutional market. Both companies together had annual revenues of over US\$ 230 mn as of December 2015.

This acquisition is aligned with Cipla's global growth strategy to grow its presence in the US pharmaceutical market and increase its position amongst key pharmaceutical wholesalers and retailers. Having its own manufacturing base and supply chain will further strengthen Cipla's presence in the US and its commitment to make high quality medication accessible to patients in the country. Cipla's strategy in the US is to deliver its complex generics and respiratory portfolio of products.

The North American business contributed 15% to overall revenues (including the impact of acquisitions) and recorded 117% growth for the year. Growth was driven primarily by the Company's partnership with Teva Pharmaceutical Industries Ltd. for Esomeprazole and the successful launch of its own label products in the US market.

Cipla currently has over 165 ANDAs filed in the US. Of these, the Company has approval for over 85.

As Cipla scales its US business next year it will target launch of five to seven products from the InvaGen pipeline and eight to ten products from Cipla's pipeline, including some in limited competition areas. In parallel, the Company will continue to build on its successful partnerships for launch of first-to-market and differentiated generics such as Nexium and Pulmicort.

Cipla has already established a strong US team which has been deeply involved in Cipla's launch of its own label products in the
