MANAGEMENT DISCUSSION AND ANALYSIS**INDUSTRY STRUCTURE AND DEVELOPMENTS**

CY2005 witnessed one of the most exciting years for the Indian capital markets. Total equity raisings for the year was over Rs. 580 bn, highest ever in the history of Indian Capital Markets out of which approximately 37% were in the form of domestic offerings and approximately 63% International equity & equity linked offerings.

The Indian stock market has been one of the best performing Asian markets in CY2005 with a 42% return, second only to Korea with a return of 55.5%. Sectors which outperformed the markets were capital goods, FMCG and technology with sectors to watch in 2006 being construction, telecom, media & real estate.

In CY2005, India witnessed the highest ever FII flows amounting to approximately Rs. 470bn. The new FII registrations were also up by 245, taking the total registrations to 823 by the end of 2005.

For the Debt business, CY2005 continued to be another bearish year with very high volatility due to monetary tightening, rate hikes, inflationary concerns and liquidity concerns. In line with the global 'removal of accommodation', the Reserve Bank of India hiked key rates twice on the back of strong economic growth and inflationary concerns, resulting in over 50 basis points increase in the benchmark 10-year Gilt yield.

Overall your company performed well in CY2005.

OPPORTUNITIES & THREATS

Your Company continues to believe that India offers tremendous opportunities to further build on a strong franchise driven by:

- *Positive macroeconomic parameters*
- *Continued emphasis on economic/social reforms*

The risk to your Company's performance stems from a significant competition in the Indian market, particularly from players seeking to establish themselves. The challenges of operating in such a highly competitive and volatile business environment could continue to pressurize margins.

SEGMENT-WISE/PRODUCT-WISE PERFORMANCE

Your Company has identified two reportable segments in accordance with Accounting Standard 17 on Segment Reporting issued by The Institute of Chartered Accountants of India. The Advisory and Transactional Services segment consists of revenues from merchant banking, broking and other transactional services and the Trading segment derives income from trading of securities (including equity and debt derivatives). Revenues from the Advisory and Transactional Services segment rose 30% YoY from Rs. 3,226mn in CY2004 to Rs. 4,186mn, resulting in a 25% YoY increase in pre-tax profit from this segment (before unallocable expenses) in CY2005. The Trading segment generated revenues of Rs. 577mn in CY2005 from Rs. 308mn in CY2004, registering an 87% YoY increase. This segment posted much higher increase in pre-tax profit (before unallocable expenses) at 154% YoY in CY2005.

Fixed Income

The uncertainty in the gilt markets and lower liquidity kept players largely away from the corporate bond segment. Despite the sluggish market conditions, your Company mobilized over Rs. 145bn for its clients in 2005 with clear market leadership in the short tenor and structured debt segments. Your Company, together with Merrill Lynch, lead managed a US\$ 500mn bond issue for ICICI Bank Ltd. This was the largest ever global bond offering by any Indian corporate and the first Indian bond offering to tap the US institutional market.

The fixed income business continued to face challenges as fixed income investments by Banks and Mutual Funds shrunk significantly and Mutual Fund investors continued to stay away from the longer tenor debt funds. However, your Company managed to perform well in this segment through diversification into new product segments like fixed income derivatives.

In spite of the bearish market scenario, the Primary Dealership business of your Company continued to perform well on the back of active trading strategies in the cash bond segment and diversification into fixed income derivatives. Your Company was highly successful in meeting all underwriting commitments made to the RBI in its capacity as a Primary Dealer.
