

From the CEO's desk....

Dear Stakeholders,

These are exciting times for our Automotive Electronics industry. The pace of innovation is breathtaking. Over the next few years the automotive OEMs will race to deploy connected-car technologies all over the globe.

With our commitment to excellence, deep domain expertise and a culture of innovation, Danlaw occupies a valuable position in the connected-car market place.

According to industry reports, the connected-car market is growing at a five-year compound annual growth rate of 45% - 10 times as fast as the overall car market. It is expected that 75% of the estimated 92 million cars shipped globally in 2020 will be built with internet-connection hardware.

Connected-car vehicles are out of reach for most car buyers, but they will drop significantly in the next few years. It is estimated that there will be 220 million connected cars on the road globally in 2020.

In US and Europe the operational trials using the VtoV (Vehicle To Vehicle) and VtoX (Vehicle to Infrastructure) communications are in full swing.

In the global automotive industry there are investments being made in these new technologies. The investments to build cloud infrastructure, data analytics, hybrid and EV technologies and autonomous driving features are growing significantly.

The R&D Spend is being driven by increased demand for embedded and software content. There are significant opportunities for technology solutions companies like us to participate in the \$150+ Billion R&D globalization and services opportunity.

We are confident our strengths will lead to new opportunities with our existing and new customers while providing solid performance for stockholders, a rewarding environment for our team members.

Summary of financial results:

- Total revenue 995 lacs as compared to 956 lacs
- Profit after tax of 94 lacs vs. 40 lacs in FY 2013-14
- Danlaw Technologies Inc. our US WOS:
 - o Total revenues of \$1.076 million
 - o Income from Operations \$232 thousand vs. \$323 thousand USD
