15. Management Discussion And Analysis Report:**OUTLOOK**

The Company is operating in 3 business segment PVC 55%, Soda Ash 17%, Chlor Alkali 28%, and is hence reasonably protected from the vagaries of business cycle.

PVC Division:

The Company is one of the six major producers of PVC and accounts for nearly 10% of the all India market share. The PVC industry continues to grow at a compounded average annual growth rate of 10% and the present demand in our country is slightly higher than the supply in the market. Your Company mainly caters to the pipe, cable, construction and profiles industries. The Company has finalised its order for replacement of 3 old glass line reactors with modern stainless steel reactors, which will increase its production capacity to around 90000 M.T. from the end of F.Y. 2004-05. The Company is also augmenting its storage capacity of VCM at its Sahupuram Plant as the Company feels that this is essential for achieving higher level of production.

The recent reduction in the import duty on PVC from 25% to 20% has narrowed the differential between our imported raw material, Vinyl Chloride Monomer (VCM) and the finished product PVC to 5%. This could have adverse impact on the profitability of the division.

Caustic Soda Division:

Your Company is a major player in South India having 15% market share and has 5% market share on all India basis. Working of the Division improved considerably due to imposition of Anti Dumping duty in the last quarter of F.Y. 2002-03 which has given protection to the local industries from cheap imports and dumping by overseas suppliers. Major aluminum producers have shifted from import to procurement from local suppliers, which ensured steady prices of the product in the F.Y. 2003-04. The profitability of

NET WORTH

(Rs. in Crores)

this division is dependent on the continued procurement by Aluminum majors from the local suppliers.

The industry is highly power intensive and the Company has taken various measures to reduce cost of captive power like import of Furnace Oil through oil company, duty free imports of oil based on exports etc. The Company is also exploring various possibilities to reduce the cost of power. However volatile international oil market is always a concern for the Company and may have an adverse impact on the profitability of the division.

Soda Ash Division:

Soda Ash industry has been growing at the rate of 5% p.a. and the same is expected to continue in the coming years also. Major producers of Soda Ash have been exporting a portion of their production, which has resulted in stabilisation of prices in the local market. This trend is expected to continue in the coming year.

The Company is in the process of replacing the 33 old carbonators with 3 carbonation towers which is expected to be completed by August 2004. This will increase the production of Soda Ash by 7000 MT per annum and is likely to reduce the variable cost marginally.

The Company has also increased its production of detergent in the current year by almost 8000 tonnes which has helped the Company to capatively consume Soda Ash.

Internal Control Systems:

The Company has adequate internal control systems commensurate with the nature of its business and size of its operations.

Internal Audit is conducted by an independent firm of Chartered Accountants.

The Audit Committee reviews on a regular basis the internal audit programme reports and adequacy of internal controls.

Human Resources:

The Company has been following a standard procedure for recruitment of best personnel for all the departments

SALES (Rs. in Crores)

and is making constant and continuous efforts to retain and groom them to meet its present and future requirements. The current strength is 2857 employees. This is basically done to enhance their skills, in order to achieve an optimum output from them.
