3. BUSINESS REVIEW AND FUTURE PROSPECTS**Software**

Company has commenced promoting the software for business integration, called 'Total', in the domestic and the overseas market. The product was launched in the market in the second half of the year. However, the marketing efforts were severely affected due to non-fulfilment of financial commitments made by the angel investors last year and the general slowdown in economy.

In spite of the set back, company could sale software worth Rs. 37.5 lakhs, which is about 120% more on annualized basis as compared to earlier year.

Company has identified SME sector as a niche market segment for its business integration product.

While the ERP implementation business for larger companies is declining the business of ERP for smaller companies is in the growth phase, which is translating into growth for the entire industry. According to research conducted by IDC, the center of growth for ERP is shifting from megacorps to the smaller companies.

Company, expects that, given the resources, it is in a position to place itself very comfortably in the SME Market place.

Training

Company commenced its mobile training academy called, Datasoft Mobile Academy, during the year. In the six months of its operation, company generated business worth Rs. 30 Lakhs.

IT Training has taken a severe blow, because of the slow down in this sector. However, company, believes that with a proper mix of cost benefits and appropriate branding it is possible to generate good business. It is more so because the mobility concept allows company to reach to the interiors and rural areas. This model also allows company to add substantial incidental revenue.
