MANAGEMENT DISCUSSION AND ANALYSIS:

OPERATIONS:

During the financial year 2006-07, the Gross Sales grew by 17% and profit before tax by 31.57% after the provisions for tax, the Company earned profit after tax of Rs.27.66 crores signifying an increase of 31.93% over the previous year.

The Auto Industry's growth of 14% over the previous year contributed to the overall economic growth of 8% of the Indian economy in a significant manner.

The passenger car market grew by 21%. The Auto Industry is witnessing introduction of newer models by the Original Equipment Manufacture (OEM) to cater to varied needs of the Indian consumer. As the competition is intensifying the margins of the players is shrinking. Those products excelling in quality and price shall outperform others.

The Auto Industry is in the next phase of technological upgradation particularly in the area of safety and fuel economy which has allowed many new entrants into the passenger car industry. This factor has also helped all the auto components manufacturers to tighten their belts in terms of cost control for extending competitive prices for its range of products to OEMs. OEMs in turn have extended these benefits to the consumers.

The market leader Maruti Udyog Limited (MUL) maintained its position with the vehicle production of MUL showing an overall growth rate of 7%. MUL's Swift has made significant strides in the 'B' segment of the industry.

Two Wheeler industry is also witnessing intense competition-Bajaj Auto and Hero Honda are growing rapidly. Hero Honda Motorcycle Limited continues to be the market leader. The overall production of two wheeler manufacturers went up by 11%.

Our Company is well equipped to cater to the needs of the OEMs who are introducing new models every year.

Opportunities and Threats:

The Indian economy is set to grow at the rate of 8% for the next year and with satisfactory monsoon predicted, the demand for passenger cars as well as two wheelers shall continue to show upward trend.

However as the competition among the OEMs intensifies the prices of the products of the Company shall be under pressure.

In order to off set this, the Company is pursuing aggressive cost control activities and the Company expects to be successful in its endeavours.

In order to cater to newer models of OEMs the Company is modifying its existing products and also adding to its existing product range to further improve its profitability levels.

However, by adding to the existing product range the Company expects to bolster its turnover and further improve its profitability levels.

Any adverse change in the Government policy is likely to have its own effect.

Despite competition and pressure on the pricing front the Company expects to maintain its competitive edge in the coming years.

The Company's operating business is organized and managed according to the nature of product, with single Primary Reportable Segment comprising of manufacturing and supply of electrical automotive components.

The on-going efforts of increasing the customer base along with introduction of new products is expected to help the Company in achieving the sales target for the next year.
