MANAGEMENT DISCUSSION & ANALYSIS REPORT**Industry Structure & Developments**

The company is a non-banking finance company, a segment, where scope for growth always exists, but for large size companies having bigger infrastructure and deeper pockets because demand for finance would always have an upward trend. However, the small size companies shall not be able to reap such benefits because of lesser opportunities. This seems to continue, however, appropriate risk calculation and management is the key factor in designing and maintaining finance portfolio and earning profits under limited resources.

Segment- wise & Product – wise performance

The company belongs only to one segment; however, it has been deploying its resources into hire-purchase, securities trading, loans and advances. The company's management has made regular endeavors for improving operating efficiencies despite of breakdown of financial system globally during the year under review

Outlook

Non-banking financial companies (NBFCs) are fast emerging as an important segment of Indian financial system. It is a heterogeneous group of institutions (other than commercial and co-operative banks) performing financial intermediation in a variety of ways, like accepting deposits. Making loans and advances, leasing, hire purchase, etc. They raise funds from the public, directly or indirectly, and lend them to ultimate spenders. They advance loans to the various wholesale and retail traders, small-scale industries and self-employed persons. Thus, they have broadened and diversified the range of products and services offered by a financial sector gradually, they are being recognized as complementary to the banking sector due to their customer-oriented services; simplified procedures; attractive rates of return on deposits; flexibility and time lines in meeting the credit needs of specified sectors; etc.

Risk & Concern

The Company is exposed to normal industry risks which it shall try to tackle by adopting prudent and comprehensive business policies. The Company has been fully compliant with all the guidelines, regulations and directions of Reserve Bank of India, as applicable. The primary risk for financial company is rapid and large shifts in exchange rates and uncertainty over interest rates besides tough competition prevailing in the market.

Internal Control System and its adequacy

The company has adequate internal control procedures in commensuration with its size and nature of business at all desired levels.

Discussion on financial performance with respect to operational performance

The financial performance of the company under reported circumstances have been directly related to efficiency in all areas of functional management such as marketing, human resources and finance. Continuing trend of deep contraction in the global economy and financial sector has led to a massive reduction in operational output.
