MANAGEMENT DISCUSSION AND ANALYSIS REPORT

Management discussion and analysis report as required under Clause 49 of the listing agreement is as under:

INDUSTRY STRUCTURE AND DEVELOPMENTS

India is fast growing economy and has become an important market in the world. India's rapid growth has brought many changes in its demographics and lifestyle. Rising income, hectic pace of life and stress have resulted in change in disease pattern, coupled with greater awareness about health and preventive measures and a demand for quality health-care.

The Indian healthcare industry comprises of public and private sectors. The private sector accounts for around 75% of total healthcare expenditure in India. Over last two decades, a majority of the tertiary care institutions in public sector have been facing resource crunch resulting in their inability to maintain and upgrade their equipment, pay for consumables and upgrade their infrastructure to meet the growing demand of complex diagnostic and therapeutic treatments. As a result, there is increasing preference for private hospitals.

Indian healthcare industry has distinct merits of clinical excellence and low cost. The sectors tenders much potential to healthcare players as there are frequent lifestyle related and other diseases in the country. The increasing elderly population and increase in income levels are also urging for better facilities in the industry. The health-conscious middle class who can afford and wants quality healthcare is the main driver of the growing sector.

OUTLOOK ON OPPORTUNITIES AND FUTURE PROSPECTS

There is a tremendous scope for growth in the health insurance sector, as the sector at present covers only 10% of the entire Indian population. Over 95% of India's private healthcare expenditure is paid for out of pocket expenditure as health insurance coverage is under 5%. However, with increasing awareness and increasing number of the domestic workforce, more and more insurance coverage is taken through corporate health plans, family and individual health plans, as a result the hospitalization rates are expected to increase.

Medical tourism is also increasing over the years and India is emerging as major tourist destination as India is exceptionally competitive in terms of healthcare cost as compared to other developed nations. India has pool of excellent doctors and nursing staff. It has advanced medical facilities in critical areas and chain of private hospitals that add competitive advantage and improve medical tourism.

The increasing population, links to other medical centers and the ability to treat a complex range of ailments are providing plenty of opportunities for the growth of the industry. The need for specialty hospitals by the people is gradually increasing. The key business opportunities are in clinical research, pharmaceuticals, food supplements, biotechnology, diagnostic centres, pharmacy chains, knowledge and business process outsourcing, education and training, medical equipment, consumables and specialized consultancy services.

THREATS, RISKS AND CONCERNS

In order to meet the demand for healthcare in India and improve the availability of hospital beds and doctors, infrastructure will need to be improved significantly. These additional beds will be required for specialty healthcare needs such as cancer and cardiac diseases in view of the growing incidence of such diseases. Since the Company is becoming stronger day by day, the required finance for the expansion / modernization programme can be mobilized from Banks / Financial Institutions.

The competition from the un-organised sector would be met by delivering quality health care on par with international standards which the un-organised sector lacks in view of constraints in investment to create a quality hospital. There is also the risk of attrition of losing the trained and experienced professionals and the investment made on them in their training. Because of increased opportunities, many private players are entering into this sector. Your Company can counter this challenge because it has an early bird advantage and also by providing focused health care delivery and by deploying the state of the art equipments backed up by a panel of expert Doctors. Threat of stiff competition by the hospitals situated adjacent to your hospital is the cause for decrease in the margins. Strict enforcement of reducing the operational cost coupled with improving the services and making use of locational advantage is expected to overcome this threat.

COMPANY OVERVIEW

At Dhanvantri, diagnostic and therapeutic services are being provided in the field of Urology, Gastroenterology, Cardiology, Neurology, Internal Medicine and Radiology including Magnetic Resonance Imaging (MRI). It has extended its scope of

diagnostic and hospital services by providing a fully operational Cath Lab, catering to higher end needs of the cardiac patients including Angiography, Angioplasty, Pacemaker Implantation, Valvuloplasty etc. The medical equipment and technology used are latest and are continuously upgraded. We have excellent senior medical teams who can ensure high class of medical care. The ultimate aim is to provide quality healthcare to all those who need it. That is why the hospital has developed a sound and highly transparent management model that takes the interests of our patients, shareholders, investors, business partners, employees, community and government bodies into account to maintain the best corporate governance, risk management, corporate ethics and compliance.

The Company continues to have a high occupancy rate of beds during the year under review. Considering the same, the Board foresees a tremendous growth in receipts on increase in the bed capacity and expansion of other hospital facilities.

INTERNAL CONTROL SYSTEM AND ITS ADEQUACY

The Company has established an appropriate system of internal control to ensure that there exists a proper control over all the transactions and that all its assets are properly safeguarded and not exposed to risk arising out of unauthorized use or disposal. The Company's defined organizational structure, documented policy guidelines, defined authority matrix and internal controls ensure efficiency of operations, compliance with internal policies and applicable law and regulations as well as protection of resources. Moreover, the company continuously upgrades these systems in line with the best available practices. Regular management committee meetings are held where reports on key performance indicators and variance analysis vis-à-vis budgets are discussed and action plans are drawn for proper follow up. Operational reports are tabled at each Board Meetings, after being discussed in Audit Committee Meetings.
