

## **Complexity, Competence, Compassion...**

Dear Fellow Shareholder.

On behalf of the Board of Directors of Dynamatic Technologies Limited and its subsidiaries, I take pleasure in presenting you with audited financial

It is not because

are difficult.

broad industry groups,

Defence, Agricultural

statements for the vear 2004-2005.

During the year under review, your company along with its subsidiaries has recorded a growth rate of 39.03% in aggregated sales and 72.10% in consolidated Net Profit before Tax.

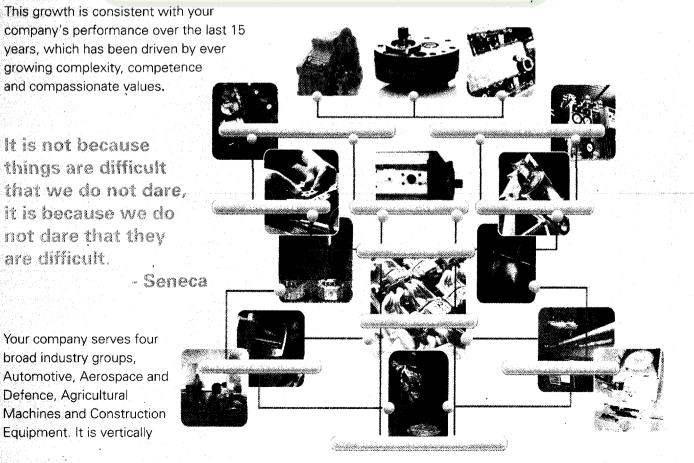

Incremental sales growth at Rs. 577.5 million-(aggregated with subsidiaries) was the highest ever recorded by your company.

integrated from production of non-ferrous alloys, casting of these materials, to the design and manufacture of components, modular assemblies and complete systems. The complexity of your company is best understood by examining its evolution.

Fifteen years ago, Dynamatic Hydraulics Limited as your company was then known, was a single product manufacturer. With sales of less than Rs. 30 million per annum, your company served a handful of tractor OEMs through the supply of Hydraulic Gear Pumps.

In 1991, a small R&D facility was set up to develop new iterations that would find application outside the tractor industry. This was the first small step in a journey of adventure and discovery, as we grew the business into other challenging areas that were technology intensive.

After facing severe material shortages in the early 1990's, your company established a small non-ferrous foundry at Bangalore. This gave us a strategic advantage over our competitors and eventually

www.reportjunction.com

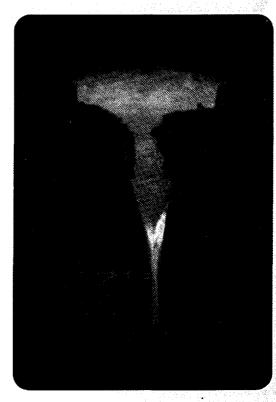

became the Dynametal<sup>™</sup> Division at Chennai. From a position of weakness, your company's Hydraulic Division has become Asia's largest manufacturer of Hydraulic Gear Pumps, and now aspires to lead the world in this business in the next few years.

In 1998, your company established JKM Dae Rim Automotive Limited, a 73% owned subsidiary in partnership with Dae Rim Enterprise Co. Limited, Korea. This business is now the largest in your company's portfolio.

Leveraging off your company's engineering skills, a small aerospace and defence business was established to support research and development by various defence PSUs. In an era where the government is now encouraging private sector participation, your company has a head start in an exciting new industry.

A man's mind, stretched by a new idea, can never go back to its original dimension.

- Oliver Wendell Holmes

tensile strength of the material increased by over 30% and elongation characteristics increased by over 4 times. Consequently, your company was able to increase the pressure rating of its pumps, without increasing the raw material.

CRORES

ŝ

The most important resource your company possesses, is not its land, its buildings, nor even its bank balances. It is the sheer quality of its human competencies.

It is these competencies that have enabled us to manage high growth, constant change and also the complexity of the organisation. As we seek out new business prospects, we constantly find problems to solve, and opportunities to improve.

A wonderful recent example was the collaboration between our Material scientists and Hydraulic designers on the development of a new series of Gear pumps. A new alloying element was introduced into the aluminium which forms the basic raw material for gear pump housings. As a result of this innovation, the

SALES GROWTH

Another great example relates to the heat traps developed on the holding furnaces at Dynametal<sup>™</sup>. This innovation has resulted in a 3% reduction in consumption of power at the foundry. This not only results in substantial cost savings, it also contributes to the sustainability of the enterprise.

Both these examples required minimal capital, and have resulted in generation of disproportionate value to your company. Such innovations take place regularly at your company.

The question always asked of us is how we are able to attract, enthuse and deploy human talent in the manner illustrated above.

# You must be the change you wish to see in the world.

#### - Mahatma Gandhi

The secret to attracting and motivating talent lies in the DNA of your company, in its compassionate values and actions. We have always sought ways to make a difference in the communities we serve.

On the morning of 26th December 2004, a Tsunami hit the coastline of Tamil Nadu. The coastal village of Nemellikuppam is located in Kanchipuram District, about 30 kms away from JKM Park which houses JKM Dae Rim and Dynametal<sup>™</sup>.

Located on the waterfront, it bore the full force of nature's fury. Concrete and stone walls were knocked

down and washed away like driftwood. Fishing boats were smashed and nets washed away.

Immediately, your company started mobilizing its resources on a war footing to provide urgent and immediate relief to the stricken village. An ad-hoc

project team was created under the name JKM Relief.

By 29th December, JKM Relief had established a community kitchen and

installed tanks filled with potable water. This prevented any outbreak of infections. Residents were moved to safer ground away from the seashore, and a medical camp was established at the village school in association with the Apollo Hospital.

Over the next two weeks, JKM Relief worked hand-inhand with residents of the village to clear debris and to rebuild village infrastructure. Keen to get fishermen

back into their regular activities, JKM Relief undertook repair work on the boats, engines and replacement of

fishnets. The village temple was repaired, and re-opened on Pongal. Immediately thereafter, the first two fishing boats were launched into the sea carrying the

Honourable Finance Minister of Tamil Nadu, Mr. Ponnaiyan, the fishermen and some of us.

As our destiny unfolds, we remain committed to building your company by enhancing its complexity, competence and compassion on a continual basis.

On behalf of our Board of Directors and Senior management, I take this opportunity to thank you for your continued support.
