Year in Retrospect

The year that went by was landmark year in the history of the Company. The new Plant started production and gained the accreditation of prestigious customers. The Company's new initiatives in technical upgradation, procurement of raw material and combating the dollar movement on export realization, helped to retain margins in an increasing cost scenario.

The turnover of the Company was Rs.105.56 Crores during the year under report and a net profit of Rs.705.25 lakhs compared to Rs.100.23 Crores of turnover and net profit of Rs.709.61 lakhs during the immediately preceding year.

The start up of operations at the new factory was delayed due to non availability of power connection, which affected the estimated high production and turnover during the year leading to a marginal growth. However, the operations are stabilizing at the new Plant and we expect a growth of 25% to 30% during the year 2008-09.

Future Outlook

The year under review witnessed a multitude of phenomenon with reference to Industrial production and costs across the globe. Rising steel prices, weakening of the dollar across most global currencies to name a few, were witnessed during the year under report..

The new facility, which has been built to global standards has been audited and approved by Major Tier I European manufacturers. This has ensured a better order book position and we are confident that there will be a surge in orders in the years to come. There is also major thrust
