As crude oil prices has come down which directly have a positive effect on the economy and in same line we expect many more positive things to happen in the global market which may have positive impact on the Company.

The global economy in FY 2014-15 witnessed divergent trends among major economies. The Indian economy and business environment remained largely subdued during 2014-15. The global economic recovery is gaining momentum coupled with some divergence. Monetary policy is also likely to be supportive with the Reserve Bank of India (RBI) having moved to flexible inflation targeting. The manufacturing sector is likely to benefit from lower interest rates. However, productivity and capital efficiency improvement are likely to drive near-term growth. Demand from export as well as domestic markets has not increased substantially. Volatility of rupee may hamper growth of economy.
