CHAIRMAN'S STATEMENT

Dear Shareholders,

The events witnessed in the period of 2012-2013 have certainly reiterated the importance of renewable energy (RE) as a pivotal part of the energy mix. Due to a series of events experienced along the course of the year, from the massive grid failures to the transmission and distribution challenges faced by various players in the power industry, renewable energy became a particular point of focus during this year gone by. The hurdles faced by the sector on the whole led to many positive policy changes and incentives being provided by the Government in the solar and wind energy sectors. This led to a reduction in the cost of producing solar energy, thanks in particular to the Jawaharlal Nehru National Solar mission.

Government intervention was the pivotal point that led to an increase in the contribution towards renewable energy, which in turn led to an increase in the contribution of renewable energy to the national electricity installed capacity, to around 12.5%. The National Action Plan on Climate Change has thus gained a lot of momentum in the year gone by. This sector also saw the involvement of more private players, thanks to the introduction of incentives like the Renewable Purchase Obligation (RPO). Companies that were skeptical about making a foray in the renewable energy sector are now realising the importance of being a part of the story of sustainable development and have thus starting investing in the RE business from a long-term perspective. Furthermore, what has been most promising is that the renewable energy is now becoming an intrinsic way of life, not only in the cities and industrial establishments but also in the interiors and villages by way of renewable energy solutions being seamlessly integrated into the daily way of life.

Your Company has been a part of this exciting growth by way of our various renewable energy projects, which includes the prestigious Maheshwar Project. Being a pioneer in the renewable energy business, we are the first private company to be awarded a hydro-electric project. The Maheshwar Project has been completed and is ready to run, with 3 turbines ready for generation. Your Company has thus, aligned its mission with that of the Government in harnessing the potential of renewable energy for the benefit of all. The Maheshwar Project is a clean and green project with zero carbon emissions. It will effectively change the lives of millions for the better, and provide much needed water and electricity to the people.

During the year your Company has considerably contributed to the solar and wind energy sectors by way of a number of prestigious projects in the country. The Company has played a pivotal role in the Supply and Installation of a Solar Wind hybrid system at the Presidents Estate, New Delhi. In addition to this, company has also been involved in the Supply, Installation and Commissioning of Solar Water heaters of various capacities at Raj Bhavan - Dehradun and Nainital. We have also brought about an installation of number of Solar Water Heaters across the region of NCR.

The focus will continue to be expanding the renewable energy business in the country by way of Solar Power and Photovoltaic projects in the country. Thanks to the various incentives provided by the Government, Your Company, being pioneers in the renewable energy space is best poised to capitalise on these incentives and bring about more innovation in the business of preserving the environment and further change for the better in the power scenario in the country.

Thanks to the Government intervention, the renewable energy industry is drawing a lot of positive focus. The introduction of tax holidays, fiscal incentives, etc. has led to the formation of a large manufacturing base in the domestic market, for renewable energy products. India has also been deemed as an excellent base for Clean Development Mechanism (CDM) projects. As a result, India is now the second-most highly targeted country after the United States with outside investors aligning their business with those of local entities in an effort to enter the Indian market. Your Company will capitalise on these positive changes, in an effort to further entrench itself in the renewable energy business.

I would like to sincerely thank the Members of the Board for their unwavering belief in our vision and mission of bringing about positive growth, while preserving the environment. I am also indebted to the faith placed in us by our valuable investors, stakeholders and employees and would, in particular, like to thank the Government for all the support rendered by them to Our Company as well as to the renewable energy sector on the whole.

I look forward to the future with optimism and I am certain that we shall make further strides in leading positive growth in the country, with the support of the Board, our Stakeholders, our Investors, our Government and our Employees alike.

Yours sincerely,

Sd/-

Mukul Kasliwal
