MANAGEMENT DISCUSSION AND ANALYSIS

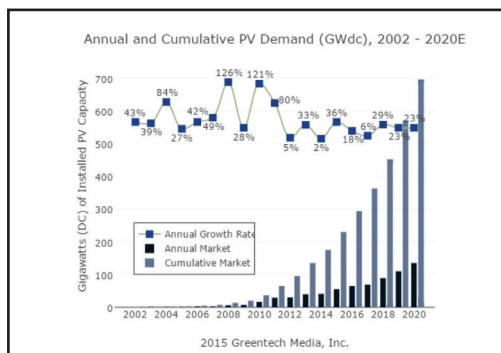

OVERVIEW

The New Government has taken several initiatives to reach its ambitious target of 100 GW of Solar Installation by 2022. The Government at same time has taken lead to support the local manufacturer by creating separate window of Domestic Content Requirement (DCR) wherein the Solar Power Installation should have locally produced solar modules and solar cells. This has created the hope for Euro Multivision Limited. This has changed the near future outlook for the local manufacturers like us, and we expect that that coming year will see activities in our Solar Plant. However, the Optical Discs business is downsizing because of market shrinkage.

BUSINESS OUTLOOK

PHOTOVOLTAIC & CELLS BUSINESS

The cumulative global market for solar PV is expected to triple by 2020 to almost 700 gigawatts, with annual demand eclipsing 100 gigawatts in 2019. Solar demand will likely be almost entirely market-based in 2020; a dramatic shift from 2012 when almost all demand was premised on direct incentives.

One implication of an increasingly unsubsidized market is that management and governance of the electric grid will change dramatically, creating both new opportunities and challenges for solar companies. This transformation is already underway with the implementation of market-based mechanisms for PV procurement and solar companies exploring innovations in business model design (Source: GTM Research)

The North American solar industry is moving ahead along with China, Japan, India and Africa. The aggressive Solar Plan of China and Japan now make up 50 percent of the world solar PV market. Japan PV Energy Association's prediction of 100 GW installation by 2030 because of attractive FIT and the interest of Japanese companies as well as FII investment in Japan has made it a quite active market. On the other hand, China has announced a mammoth plan of 35 GW for 2015 solar deployment.

Rooftops and microgrids have also taken off across the Globe and more particularly in the developing countries, where power accessibility is poor and grid transmission is issue because of difficult geographical terrain. Africa and other areas with large, remote mining industries also are attracting solar as an off grid form of power to pair with diesel or help shore up an unstable grid connection.

It has drawn attention of the investors in Solar Energy, who look for steady revenue streams and quality security resulting in Solar Market's access to low cost of finance. Apart from this, the capex reduction because of technological upgradation has further improved the market attractiveness.
